P•700 SERIES COMBO GUIDE

For players committed to the grind, P·Series awaits. An added benefit is the ability to combo, or mix and match, iron sets. This chart will help identify how your lofts should be adjusted for proper gapping based on your desired level of forgiveness.

MILLED GRIND 5

LB

Designed for players who want the leading edge to sit low to the ground in a variety of face positions. Intended for shallow swing styles and tight, firm conditions.

CONDITION TYPE: FIRM | MEDIUM | SOFT

SWING TYPE: SHALLOW | NEUTRAL | STEEP

SC

Built for the golfer who plays in all types of conditions and demands ultimate greenside versatility. Also provides consistent stability on full shots with heel and toe relief when manipulating the face.

CONDITION TYPE: FIRM | MEDIUM | SOFT

SWING TYPE: SHALLOW | NEUTRAL | STEEP

SB

Great fit for an array of swing styles and turf conditions. A gentle 4-way camber creates smooth turf interaction with forgiveness on partial swings and bunker shots.

CONDITION TYPE: FIRM | MEDIUM | SOFT

SWING TYPE: SHALLOW | NEUTRAL | STEEP

SX

Our widest sole option uses increased sole curvature to glide through any turf condition with unmatched consistency from the bunker. Our signature "Reverse-C" trailing edge relief is designed to keep the bounce consistent as you manipulate the face.

CONDITION TYPE: FIRM | MEDIUM | SOFT

SWING TYPE: SHALLOW | NEUTRAL | STEEP

HB

A high bounce sole option designed with versatility as demanded by better players. Unique heel relief and increased bounce towards the toe is great for softer conditions or steeper swings.

CONDITION TYPE: FIRM | MEDIUM | SOFT

SWING TYPE: SHALLOW | NEUTRAL | STEEP

TW

Updated to match Tiger's recent wedge preferences. A new leading edge blend with increased effective bounce in the heel.

CONDITION TYPE: FIRM | MEDIUM | SOFT

SWING TYPE: SHALLOW | NEUTRAL | STEEP

HI-TOE 4

ATS

CONDITION TYPE

FIRM — NEUTRAL — SOFT

SWING TYPE

SHALLOW — NEUTRAL — STEEP

An increased 4-way camber is a staple in this sole design providing versatility for manufacturing shots with an open or closed face.

ATV

CONDITION TYPE

FIRM — NEUTRAL — SOFT

SWING TYPE

SHALLOW — NEUTRAL — STEEP

A unique asymmetric bounce and concave sole creates a multifunctional design for crisp, clean contact off tight lies while playing with more effective bounce in the open face position for all around versatility.

PROGRESSIVE VS. TRADITIONAL LENGTH IRONS

IRON LENGTH NOTIFICATION

Starting in 2009, TaylorMade has offered 2 different lengths of irons referred to as Progressive Length & Traditional Length. Each length is designed to offer the best performance for a given iron design. The Progressive length is only offered in Qi/QiHL irons. Traditional lengths are used in all player iron offerings, such as our P•700 Series irons.

WHAT IS THE DIFFERENCE BETWEEN THE LENGTHS OF IRONS?

See below the actual lengths of an iron built at Progressive and Traditional specifications.

	4 IRON	5 IRON	6 IRON	7 IRON	8 IRON	9 IRON	PW	AW	SW	LW
Progressive	39.13"	38.50"	37.88"	37.25"	36.75"	36.25"	35.75"	35.50"	35.25"	35.00"

WHAT IS THE BENEFIT OF PROGRESSIVE LENGTHS?

Progressive lengths offer golfers improved distance and gapping.

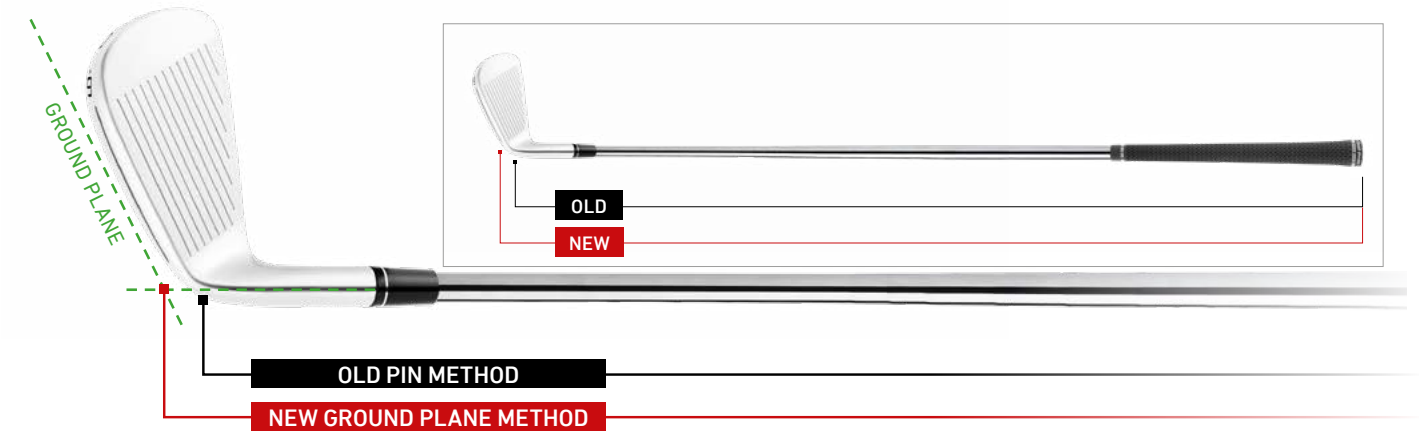
GAME IMPROVEMENT IRON LENGTH CHANGE NOTIFICATION

TAYLORMADE GOLF COMPANY CUSTOM DEPARTMENT NOTICE REGARDING LENGTH MEASUREMENT

ATTENTION CUSTOM FITTERS AND ACCOUNTS!

As of 11/1/18, TaylorMade has improved the way we measure and list the overall club length for our iron products. In the past, we measured overall club length using a method referred to as the "pin length." Moving forward, we will be using the measurement method known as "ground plane." The ground plane method is the closest method to an industry standard and is the preferred measurement method of the USGA. Our goal is to simplify the club-length measurement process and improve build accuracy by switching to the preferred USGA ruler. Now matching a customer's existing club length will be easier than ever!

NEW GROUND PLANE MEASUREMENT METHOD



WHAT YOU NEED TO KNOW...

- Our lengths have changed slightly for the past game improvement irons (SIM2 MAX, SIM2 MAX OS, SIM MAX, SIM MAX OS, M6, M5).
- When compared to the specified club length of previous game improvement irons (STEALTH, SIM2 MAX, SIM2 MAX OS, SIM MAX, SIM MAX OS, M6, M5) appear longer in the specification table but are actually VERY similar in length to previous product (see below).
- Iron lengths are within 1/8" or less of the previous models.
- In order to keep the physical club lengths as close as possible to previous models, we rounded lengths to the nearest 1/8". This required some irons to get slightly longer and others to get slightly shorter.

See below a table for reference. This shows the current and prior game improvement iron lengths if they were all measured on the new Ground Plane. As you can see the prior M Series Irons are within 1/8" of the physical lengths of the SIM MAX, SIM MAX OS, M6 & M5 irons.

		4	5	6	7	8	9	PW	AW
Prior M Series Product	M3, M4, MCGB Max	38.65	38.03	37.39	36.97	36.43	35.95	35.91	35.84
Latest Game Improvement Product	Qi, QiHL, SIM2 MAX, SIM2 MAX OS, SIM MAX, SIM MAX OS, M6, M5	39.13	38.50	37.88	37.25	36.75	36.25	35.75	35.50

Now that we are matching the USGA method of measurement the fitting process will be easier than ever. Rest assured this will help the accuracy of orders and custom builds moving forward. If you have any questions about this change or how to get your custom order best fit for you, please do not hesitate to call our customer service team at 1-800-888-CLUB!

P•SERIES LENGTH CHANGE NOTIFICATION

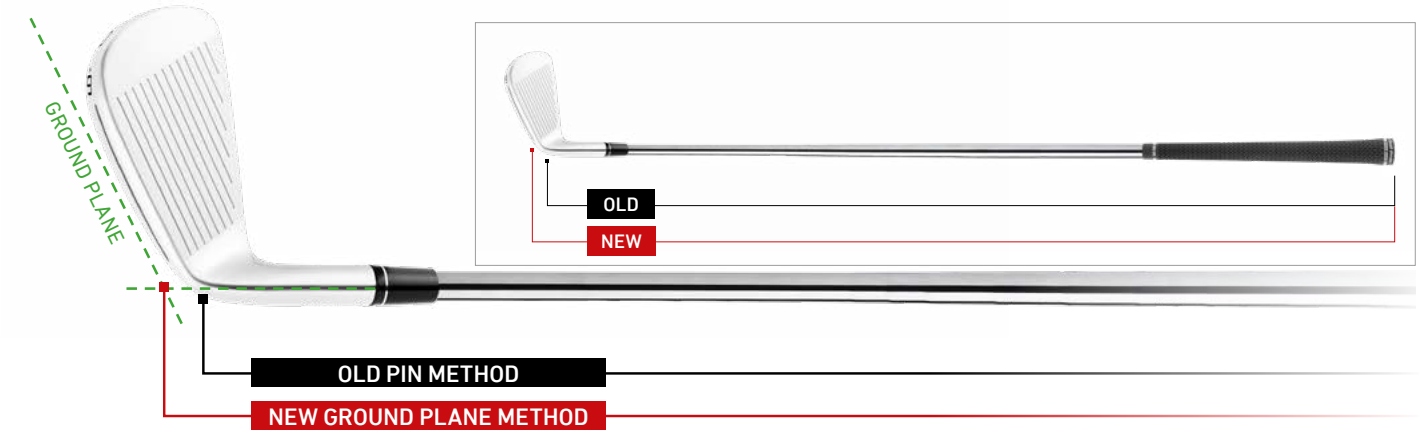
NEW GROUND PLANE MEASUREMENT METHOD



WHAT YOU NEED TO KNOW...

- Our lengths are changing slightly for latest P•Series Product (P7TW, P7MB, P7MC, P770, P790).
- When compared to the specified club length of previous P•700 series irons the new lengths appear longer, however the physical lengths are slightly shorter (see below).
- Iron lengths are within 1/8" of the previous model (AW is 1/2" different as we want the align the length with the new wedge lengths).
- We have updated our graphite shaft lengths to be the same as the steel shaft builds. This effectively makes graphite shaft club lengths 1/4" shorter than the previous generation.

See below a table for reference. This shows the current and prior P•Series iron lengths if they were all measured on the new Ground Plane. As you can see the prior P•Series Irons are 1/4" longer or less than the previous generation. (+.5" in the AW).

		3	4	5	6	7	8	9	PW	AW
Prior P•Series Models	P730, P750, P770, P790	39.13	38.63	38.13	37.63	37.13	36.63	36.13	36.00	36.00
Current P•Series Models	P7TW, P7MB, P7CB, P770, P790	39.00	38.50	38.00	37.50	37.00	36.50	36.00	35.75	35.50

HOW DO I ORDER NEW IRONS?

- If you were fit for a new iron, perfect! You don't need to do anything except order what you were fit for.
- If you are trying to match the length of a previous P•Series set, we would recommend adjusting your club's length by +1/4" to prevent your new irons from coming in shorter than your current build specifications.

Now that we are matching the USGA method of measurement the fitting process will be easier than ever. Rest assured this will help the accuracy of orders and custom builds moving forward. If you have any questions about this change or how to get your custom order best fit for you, please do not hesitate to call our customer service team at 1-800-888-CLUB!

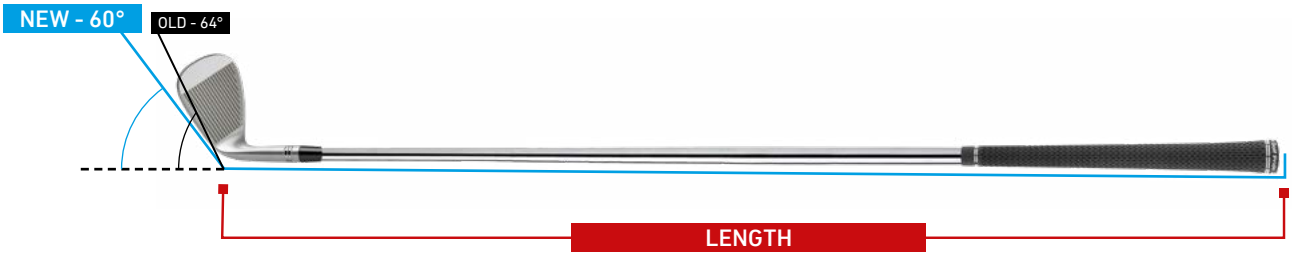
WEDGE LENGTH CHANGE NOTIFICATION

TAYLORMADE GOLF COMPANY CUSTOM DEPARTMENT NOTICE REGARDING LENGTH MEASUREMENT

ATTENTION CUSTOM FITTERS AND ACCOUNTS!

As of 9/6/2019 TaylorMade has improved the way we measure the overall club length for our wedges. In November of 2018 we changed the measurement method to a 60° ground plane and we wanted to do the same for the wedges. This is in effort to continue to simplify the clubs-length measurement process and build so all products are measured the same way.

NEW GROUND PLANE MEASUREMENT METHOD



WHAT YOU NEED TO KNOW...

- The length of our new wedges would seem to be the same length as they have been in the past on paper however due to the measurement change previous wedge models are in fact +1/8" longer.
- Not all wedges have been converted over to the new measurement method. See below for details.

WEDGE	LENGTH
MG4	New Std
MG3	New Std
MG2	New Std
Hi-Toe 4	New Std
Hi-Toe RAW	New Std
Hi-Toe Bigfoot	New Std
Hi-Toe	Old std (+1/8" longer)
MG 1	Old std (+1/8" longer)

HOW DO I ORDER NEW WEDGES?

- If you were fit for your new wedges, perfect. You don't need to do anything except order what you were fit for
- If you are trying to match the length of a previous TaylorMade Wedge, we would recommend adjusting your club's length by +1/4" to prevent your new irons from coming in shorter than your current build specifications.

Now that we are matching the USGA method of measurement the fitting process will be easier than ever. Rest assured this will help the accuracy of orders and custom builds moving forward. LAUNCH & SPIN

The final keys to helping a golfer gain more distance is through optimizing their launch conditions – Launch Angle and Spin Rate. To maximize distance for the golfer, the fitter should be trying to provide the highest degree of launch with the lowest spin achievable at their ball speed.

The table below shows a range of optimum launch conditions to maximize distance at varying speeds.

OPTIMIZATION CHART - DRIVER		
Ball Speed (Mph)	Launch Angle (°)	Spin (rpm)
185	10 - 14	2150 - 2800
180	10 - 14	2150 - 2800

Higher launch and lower spin moves generally along landing angle lines. Higher launch and higher spin will increase landing angle.

CUSTOM DRIVER / FWY SHAFT OPTIONS

TaylorMade will continue to offer drivers lengths of +1.75 inches, which may exceed the total 46 inch limit as defined by the USGA. Please be aware of this during your fitting sessions. If a golfer intends to purchase and use such a driver in a sanctioned competition, please alert them to the fact that it may not meet the conforming standards as defined by the USGA's Model Local Rule G-10: "In making a stroke, the player must not use a club, except for a putter, which exceeds 46 inches in length.

Advise golfers purchasing drivers at +1.75 to check local rules and/or measure their driver from the end of the grip to assure conformity prior to competing. Variables than can contribute to deviations in length measurements include grip size and/or the presence of a grip cap, such as a tracking tool.

TAYLORMADE JUNIOR SPEC EQUIPMENT

As your game grows, so should your equipment. TaylorMade introduces customized Junior Spec clubs, delivering premium in-line products fit for the intermediate junior golfer. It ensures high-level performance throughout the bag for the competitive or aspiring player dedicated to improving. Junior Spec clubs are the gateway to a higher level of golf.

DETAILS:
TaylorMade's Junior Spec offerings include more than a dozen shaft options and every in-line TaylorMade product. Shorter lengths and lighter swingweights make them fully customizable for junior golfers who have outgrown boxed sets, but are not quite ready for full-length equipment. Additional grip offerings and a range of loft/lie options allow for precision fit equipment that helps the golfer unlock their full potential.
