Frequently Asked Questions

- **Q: How do I update the firmware on my device using the 10ZiG Manager?**
  A: To update the firmware, log in to the 10ZiG Manager Web Console, navigate to the Firmware Update section, select the device you want to update, and follow the on-

screen instructions to initiate the firmware update process.

- **Q: Can I use the 10ZiG Manager with devices running older firmware versions?**
  A: The 10ZiG Manager may require a minimum client firmware version for certain features or compatibility with specific components. Ensure your devices meet the minimum firmware requirements for optimal performance.

- **Q: How can I troubleshoot connectivity issues with the 10ZiG Secure Connector?**
  A: Check network settings and firewall configurations, and ensure the Secure Connector is properly installed and running on the device. You can also refer to the user manual or contact support for further assistance.
