If your TV has Digital Optical Out

Please use the Optical cable to connect your TV to the OPT INPUT port on the transmitter

- Go to your TV's SOUND settings, make sure that the AUDIO OUTPUT has been set to "External Speaker" or "Optical Out". Some TVs automatically complete this step for you, some don't.

- Since Bluetooth cannot handle Dolby/DTS, you need to go to TV's SOUND settings, make sure that the DIGITAL AUDIO FORMAT has been set to PCM (or STEREO) If you see DOLBY in the menu, turn it OFF.

Ensure the MIC/ AUX/OPT audio input switch on transmitter has been switched to "OPT position". Now you can stream audio from your TV.

If your TV has an AUX/3.5mm Out .

Please use the AUX cable to connect your TV to the AUX INPUT port on the transmitter.

Ensure that the MIC/AUX/OPT audio input switch on transmitter has been switched to AUX position.

Now you can stream audio from your TV.

If you still can't hear anything through the headphones, please set the Sound Out/Speaker setting on your TV to "Wired headphones" or "Headset".

FCC

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference. Changes or modifications not expressly approved by 1Mii Ltd. will void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between equipment and receiver
- Connect the equipment to an electrical outlet on a different circuit to that which the receiver is connected
- Consult the manufacturer or an experienced radio/TV technician for help.

This product, like other radio devices, emits radio frequency electromagnetic energy and operates within the guidelines found in radio frequency safety standards and recommendations. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and

committees of scientists who continually review and interpret the extensive research literature.

Warranty

Warranty service is limited to normal use. Any man-made damages such as from connecting to an unsuitable power source, using an unsuitable device, or not following the instructions, as well as damages that did not occur during shipping, repairs and adjustments not approved by the company. Damages from misuse, inattention or improper installation may cause the warranty to be ineffective immediately. This warranty does not include shipping fee.
