## Important Safety Instructions

### Read All Instructions Before Use

This owner's guide and any additional inserts are considered part of the product. They contain important information about safety, use, and disposal. Before using the product, please familiarize yourself with all operating and safety instructions.

### General Safety Precautions

- Always unplug the appliance when not in use or before cleaning.
- Do not operate any fan with a damaged cord or plug. Discard fan or return to an authorized service facility for examination and/or repair.
- Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Arrange cord away from traffic area and where it will not be tripped over.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the air circulator.
- Do not use this air circulator near water, such as a bathtub, washbowl, laundry tub, swimming pool, or in a wet basement.
- This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

### International Disclaimer

This item is built to meet U.S. voltage requirements and may not function properly when used in conjunction with external devices that alter or convert voltage or frequency of electricity. Improper use or shipping the product outside the U.S. will void all warranties.

## Setup

### Unpacking Your Air Circulator

Carefully remove the Vornado 660 AE from its packaging. Ensure all components are present and undamaged.

### Placement

For optimal performance, place the air circulator in a location where its airflow will not be obstructed. The Vornado 660 AE is designed for whole-room circulation, so central placement is often ideal.

## Maintenance

### Cleaning Your Air Circulator

Regular cleaning of your Vornado 660 AE will ensure optimal performance and extend its lifespan.

1. **Unplug:** Always unplug the air circulator before cleaning.
2. **Clean Exterior:** Use a soft, damp cloth to wipe the exterior of the unit. Do not use gasoline, thinners, solvents, ammonia, or other chemicals.
3. **Clean Grille and Blades:** The front grille can be removed for easier cleaning of the blades. Gently twist the grille counter-clockwise to unlock and remove it. Use a soft brush or vacuum cleaner to remove accumulated dust from the blades and inside the grille.
4. **Reassemble:** Ensure all parts are dry before reattaching the grille (align and twist clockwise to lock) and plugging the unit back in.

### Storage

When not in use, store your air circulator in a cool, dry place. It is recommended to store it in its original packaging or

cover it to protect it from dust.
