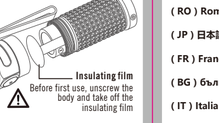
All above specifications are test results based on ANSI/NEMA FL1-2009 Standard. The tests are performed using the battery included in the flashlight.

BATTERY INSTALLATION

Ensure the battery is inserted with the negative (-) end pointing to the head of the flashlight (LED side).

AVAILABLE BATTERIES

- 1 x 550mAh 3.7V IMR16340 Lithium Battery



CHARGING

Charge the flashlight before your first use. Connect one end of the portable charging cable with an external USB power source and attach the other end to the tailcap. The charging indicator light glows red while the flashlight is being charged. The charging indicator will glow green when the flashlight is fully charged or on standby. A USB power source is not included in the package. You can charge the product through USB ports on the computer, USB mobile phone chargers, or portable power banks.

A complete charging process will take about 50 minutes.
