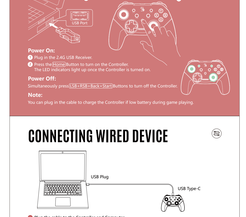
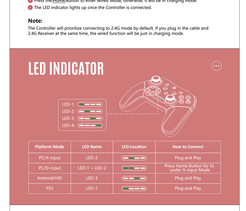
WIDE COMPATIBILITY

Note: You can only choose one mode to connect with the Controller.
Can not operate different modes at the same time.



CONNECTING 2.4G DEVICE



Power On:

1. Plug in the 2.4G USB Receiver.
2. Press the Home Button to turn on the Controller.
   The LED indicators light up once the Controller is turned on.

Power Off:

Simultaneously press LB + RLB + Back + Start Buttons to turn off the Controller.

Note:

You can plug in the cable to charge the Controller if low battery during game playing.

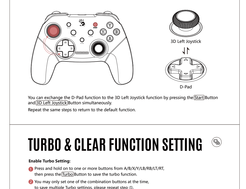
CONNECTING WIRED DEVICE

1. Plug the cable to the Controller and Computer.
2. Press the Home Button to enter Wired Mode, otherwise, it will be in charging mode.
3. The LED indicator lights up once the Controller is connected.

Note:

The Controller will prioritize connecting to 2.4G mode by default. If you plug in the cable and 2.4G Receiver at the same time, the wired function will be just in charging mode.

LED INDICATOR



Platform Mode	LED Name	LED Location	How to Connect
PC/X-input	LED-2		Plug and Play
PC/D-input	LED-1 + LED-2		Press Home Button for 5 under X-Input Mode
Android/HID	LED-3		Plug and Play
PS3	LED-1		Plug and Play

CONNECT WITH PC PLATFORM

PC/X-Input Mode

1. Plug the 2.4G Receiver to the PC.
2. Press the Home Button to turn on the Controller.
3. The LED indicators flash when pairing.
4. The LED 2 lights up once the Controller is connected.

Mode Exchange (PC/X-Input to PC/D-Input)

1. Long press the Home Button for 3s to turn into PC/D-Input. The LED 1 & LED 2 light up.
2. Long press the Home Button for 3s again to back to PC/X-Input. The LED 2 lights up.

CONNECT WITH ANDROID PLATFORM

1. Plug the 2.4G Receiver to the Android Device.
   (Smart TV Set Top Box, Smart Phone, Tablet based on Android v5.0 and above)
   Note: An OTG adaptor will be needed for smartphones and tablets.
2. Press the Home Button to turn on the Controller.
3. The LED indicators flash when pairing.
4. The LED 3 lights up once the Controller is connected.

* The OTG Adaptor is for demo only, not included in the package.

CONNECT WITH PLAYSTATION 3

1. Plug the 2.4G Receiver to your PS3.
2. Press the Home Button to turn on the Controller.
3. The LED indicators flash when pairing.
4. The LED 1 lights up once the Controller is connected.

3D JOYSTICK AND D-PAD SWITCHING

You can exchange the D-Pad function to the 3D Left Joystick function by pressing the Start Button and 3D Left Joystick Button simultaneously.
Repeat the same steps to return to the default function.

TURBO & CLEAR FUNCTION SETTING

Enable Turbo Setting:

1. Press and hold on to one or more buttons from A/B/X/Y/LB/RB/LT/RT, then press the Turbo Button to save the turbo function.
2. You may only set one of the combination buttons at the time, to save multiple Turbo settings, please repeat step ①.
3. For example: If you like to set button ○ to be Turbo function, first press and hold ○ and then press the Turbo Button to save it. If you like to do the same to combination □ + ○, then you need to first press and hold button □ + ○ and then press the Turbo Button. Repeat this for all the buttons you like to set.

Clear Turbo Setting:

1. Press one or more buttons with Turbo function, then press the Clear Button to clear the Turbo Setting.
2. To clear all the previously set Turbo Settings, you need to clear them one by one.
   Repeat the steps until all keys are cleared.

CHARGING/LOW BATTERY INDICATOR

Flashing green light indicates when the battery is below 10%.

Playtime: Up to 13 hrs

Sleep Mode:

The LED indicator will turn off and the Controller goes to sleep after 5 minutes of no usage.
Note: You can press the Home Button to wake up the Controller.
