FISCON 36430

Kufatec FISCON Bluetooth Hands-Free System for Audi Chorus/Concert II and Symphony II (Model 36430)

1. Introduction

1.1 Product Overview

The Kufatec FISCON Bluetooth hands-free system is designed for full integration into your vehicle's infotainment system. This integration allows for convenient operation using existing vehicle buttons and displays comprehensive information on the Driver Information System (FIS) screen, eliminating the need for additional external control units.

1.2 Key Features

- Full integration into the vehicle's infotainment system.
- Display of caller data and phonebook on the FIS screen.
- Menu control via vehicle buttons, including multifunction steering wheel (if available).
- Voice output through vehicle speakers for optimal sound quality.
- Bluetooth A2DP audio streaming for music playback from your mobile phone.
- AVRCP control of audio stream via vehicle buttons.
- Phonebook synchronization with name/number display.
- Access to all call lists.
- Display of incoming calls with phonebook name matching.
- Supports up to 5 mobile phones simultaneously.
- Digital audio processor with echo and noise reduction.
- All standard vehicle functions are retained.

2. Compatibility

2.1 Compatible Vehicles

The FISCON system is compatible with the following Audi vehicle models:

- Audi A3 (8P)
- Audi A3 Sportsback
- Audi A3 Cabrio

- Audi A4 (8E/B6/B7)
- Audi A6 (4B) (from year 2000)
- Audi TT (8J)
- Audi TT Roadster
- Audi TT Coupé

2.2 Compatible Radio and Navigation Systems

The system is compatible with the following radio and navigation systems:

- Chorus II
- Concert II
- Symphony I (Mini-ISO)

3. Setup and Installation

The Kufatec FISCON system is designed for seamless integration into your vehicle's existing wiring harness. Installation typically involves connecting the module and its wiring harness to the vehicle's radio and power supply. Due to the complexity of vehicle electronics, professional installation by a qualified technician is recommended.

This image displays the Kufatec FISCON Bluetooth module, a compact black box, connected to a complex wiring harness with various colored connectors (red, yellow, blue, green) designed for integration into an Audi vehicle's audio system. An antenna cable is also visible.

3.1 Software Updates

The FISCON Bluetooth interface is always delivered with the current software version. For future updates, please refer to the Kufatec support website.

4. Operating Instructions

4.1 Phone Functions

- **Phonebook Synchronization:** The system automatically synchronizes your mobile phone's phonebook, displaying names and numbers on the FIS screen.
- **Call Lists:** Access and view all call lists (dialed, received, missed calls) directly through the vehicle's display.
- **Incoming Calls:** Incoming calls are displayed on the FIS screen with the caller's name if available in the synchronized phonebook.
- **Multiple Phones:** Up to 5 mobile phones can be paired and managed by the system simultaneously.
- **Audio Quality:** A digital audio processor with echo and noise reduction ensures clear voice quality during calls.

4.2 Audio Streaming (A2DP)

The FISCON system supports Bluetooth A2DP, allowing you to stream music stored on your mobile phone directly to the vehicle's infotainment system. Playback control (e.g., skip track) is possible via AVRCP using the vehicle's buttons.

Figure 3: Various smartphones compatible with Bluetooth connectivity. A collection of five different smartphones, including models from BlackBerry, HTC, and Apple, are shown. This illustrates the broad compatibility of the FISCON system with various Bluetooth-enabled mobile devices.

4.3 Control via Vehicle Buttons

All functions of the FISCON system, including phone calls and audio streaming, are controlled through the existing buttons on your vehicle's radio or multifunction steering wheel. This ensures a familiar and integrated user experience.

6. Troubleshooting

If you encounter issues with your FISCON system, consider the following general troubleshooting steps:

- **No Power/Function:** Ensure all connections are secure and correctly installed. Check vehicle's fuse box for any blown fuses related to the radio or infotainment system.
- **Bluetooth Pairing Issues:** Ensure your mobile phone's Bluetooth is enabled and discoverable. Delete previous pairings on both the phone and the FISCON system, then attempt to pair again.
- **Poor Audio Quality:** Verify that the digital audio processor's echo and noise reduction features are active. Ensure your phone's volume is appropriately set.
- **Display Issues:** If information is not displaying correctly on the FIS screen, ensure the system is properly integrated with the vehicle's CAN-bus system.
- **Software:** Ensure the system is running the latest software version.

For persistent issues, it is recommended to consult a professional installer or contact Kufatec support.

7. Maintenance

The Kufatec FISCON system requires minimal maintenance. Keep the module and connections free from moisture and extreme temperatures. No user-serviceable parts are inside the module. Regular software updates, if available, can ensure optimal performance and compatibility with newer mobile devices.

8. Warranty and Support

Information regarding specific warranty terms and detailed support contacts for the Kufatec FISCON system is not available in this document. Please refer to the product packaging, the manufacturer's official website, or your point of purchase for warranty details and customer support options.
