Troubleshooting

Question: Can't pair successfully after multiple connections?

Solution

1. Check if the blue Bluetooth indicator lights on, if the indicator goes off, please slide the ON/OFF switch to "ON", if the blue Bluetooth indicator doesn't light on yet, please charge the unit.
2. Perhaps there are many Bluetooth devices around the surroundings to interfere the searching, please close the Bluetooth function in the device you don't need
3. Power off and then power on the unit, to restart the Bluetooth function of the unit or your Bluetooth device.
4. Unplug the AUX cable from the unit, and re-palr the unit and the Bluetooth device.

Questlon: The Sound occurs staccato when play ?

Solution :

1, Make sure the working distance is in 8-12m.
2. Clear away the block between the unit and the Bluetooth device to prevent the poor connecting.
3. Please check if the unit and the Bluetooth device is in low battery,
if so, please charge the unit and your Bluetooth device
