FAQ – Frequently Asked Questions

What systems does this controller work with?

It works with Switch primarily.
This controller is especially made for Switch Online games.

Can I connect this controller to Android, Windows 10, macOS, Raspberry Pi, iPhone, iPad, PS3, PS4, XBOX one, XBOX 360, Wii, Wii U directly?

No, you can not.

What are TA, TB and HOME buttons for on this controller?

TA and TB are turbo buttons. T stands for Turbo. TA is for turbo A, TB is for turbo B. HOME button = Switch HOME button.

Can I get out the Switch online pause manual like what you do with ZL+ZR buttons on Switch controller?

Yes, you can. Just press down the two shoulder buttons.

How do I charge the controller? How long does the battery last when fully charged?

We suggest you charge it via a phone power adapter.
The controller uses 480mAh rechargeable battery with 1-2 hour charging time. The battery can last up to 18 hours when fully charged.

What is the Micro USB port for? Can I use it as a wired controller?

The Micro USB port is for power charging and firmware upgrade.
No, you can not use it as a wired controller.

My N30 NS does not connect to Switch no matter how many times I have tried. What should I do?

This might be caused by there are too many controllers connected to your Switch, as one Switch can take up to 10 controllers at a time maximum. Please follow the steps below to fix it:

- A. Go to 'System Setting' on your Switch, then click on 'Controllers and Sensors' to disconnect the controllers which are connected to it
- B. Restart your Switch
- C. Press and hold START to turn back on the controller. Press SELECT button for 3 seconds
- D. Go back to 'System Settings' and choose 'Change Grip/Order' to pair them

How many N30 NS controllers can I use at a time?

It depends on the number of controllers each device can take. Multiple N30 NS controllers can be used at a time.
