- **Disconnect Power:** Before beginning any installation or maintenance, ensure the equipment is turned off, unplugged, and any power sources (e.g., spark plug wires, battery) are disconnected to prevent accidental startup.
- **Allow Cooling:** If the equipment has been recently operated, allow it to cool down completely before handling any parts.
- **Wear Protective Gear:** Use appropriate personal protective equipment (PPE) such as gloves and eye protection.
- **Use Correct Tools:** Employ the proper tools for the task to avoid damaging the part or the equipment.
- **Consult Equipment Manual:** Refer to your specific equipment's owner's manual for detailed instructions on accessing and replacing components.
