Connection

 NES Classic Edition (wireless connection)

1. Plug the 2.4G Retro Receiver into your NES Classic Edition.
2. Press START on your controller to connect to the Retro Receiver.
3. LED will be solid blue when the connection is successful.
 - If the connection is lost or you wish to pair with a new retro receiver, press and hold SELECT on the controller for 3 seconds. Blue LED will rapidly blink and be solid blue when the connection is successful.
