**8BitDo Ultimate Wired Controller**

## Overview

## Windows

**required system:** Windows 10(1903) or above

1. connect the controller to your Windows device via its USB cable
2. wait till the controller is successfully recognized by your Windows to play, status LED becomes solid

## Android

**required system:** Android 9.0 or above

OTG support is required on your Android device. Please contact your device manufacturer for more details

1. hold the B button, and connect the controller to your Android device via its USB cable
2. wait till the controller is successfully recognized by your Android to play, status LED becomes solid

## Switch

- OTG cable is required for Switch Lite
- Switch system needs to be 3.0.0 or above
- go to System Setting > Controller and Sensors > Turn on [Pro Controller Wired Communication]
- NFC scanning, motion control, IR camera, HD rumble, and notification LED are not supported, nor can the system be wakened up

1. connect the controller to your Switch dock via its USB cable
2. wait till the controller is successfully recognized by your Switch to play, status LED becomes solid

## Turbo function

- D-pad, Left stick, Right stick are not supported
- status LED blinks continuously when the button with turbo functionality is pressed
- hold the button you would like to set turbo functionality to and then press the star button to activate/deactivate its turbo functionality

## Ultimate Software

- It gives you elite control over every piece of your controller: customize button mapping, adjust stick & trigger sensitivity, vibration control, and create macros with any button combinations
- please visit [app.8bitdo.com](https://app.8bitdo.com) for the application

## Safety Warnings

- Please always use batteries, chargers, and accessories provided by the manufacturer.
- The manufacturer is not liable for any safety issues arising from the use of non-manufacturer-approved accessories.
- Do not attempt to disassemble, modify, or repair the device yourself. Unauthorized actions may result in serious injury.
- Avoid crushing, disassembling, puncturing, or attempting to modify the device or its battery, as these actions can be dangerous.
- Any unauthorized changes or modifications to the device will void the manufacturer's warranty.

## Support

- Please visit [support.8bitdo.com](https://support.8bitdo.com) for further information & additional support
