Zenna Home 9065NN

Zenna Home 9065NN Bathroom Spacesaver Instruction Manual

Model: 9065NN | Brand: Zenna Home

Introduction

This manual provides detailed instructions for the assembly, use, and maintenance of your Zenna Home 9065NN Bathroom Spacesaver. Designed to maximize storage in your bathroom, this unit features a durable satin nickel finish and three wire shelves. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

Product Overview

The Zenna Home 9065NN Bathroom Spacesaver is a metal over-the-toilet storage unit designed to utilize vertical space efficiently. It features three wire shelves for organizing toiletries, linens, and other bathroom essentials. The satin nickel finish provides a contemporary aesthetic and resistance to rust.

- **Material:** Metal construction with a satin nickel finish.
- **Storage:** Three wire shelves.
- **Dimensions:** Approximately 9.5"D x 25.19"W x 66.38"H.
- **Clearance:** Bottom shelf is 33.5 inches from the ground, suitable for most standard toilets.

Parts List

Before assembly, ensure all components are present and undamaged. The package includes the spacesaver frame components and all necessary hardware for assembly.

- Spacesaver frame components (legs, crossbars, shelves)

- Assembly hardware (screws, bolts, finial end caps)
- Illustrated assembly instructions

Setup and Assembly Instructions

Assembly is designed to be straightforward. Follow these steps carefully. A screwdriver may be required.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratching. Verify all parts are present against the included parts list.
2. **Assemble Side Frames:** Attach the horizontal crossbars to the vertical leg pieces to form the side frames of the spacesaver. Ensure all connections are secure but do not fully tighten screws until the entire unit is assembled.
3. **Attach Shelves:** Secure the wire shelves to the assembled side frames. The bottom shelf should be positioned to allow 33.5 inches of clearance for your toilet.
4. **Connect Rear Support Bar:** Install the adjustable rear support bar. This bar is designed to fit behind your toilet's water supply line and shut-off valve. Adjust its position as needed for a proper fit.
5. **Tighten All Fasteners:** Once all components are in place and the unit is upright, carefully tighten all screws and bolts. Do not overtighten.
6. **Install Finial End Caps:** Place the decorative finial end caps on the top posts of the spacesaver.
7. **Position the Spacesaver:** Carefully slide the assembled spacesaver over your toilet. Ensure it is stable and level. For added stability, consider anchoring the unit to the wall if possible, using appropriate hardware (not included).

Operating and Usage

The Zenna Home 9065NN Bathroom Spacesaver provides three levels of storage for various items. Place toiletries, towels, decorative accessories, or other bathroom essentials on the shelves. Ensure items are distributed evenly to maintain stability.

- Do not overload shelves beyond their capacity.
- Avoid placing heavy or unstable items on the top shelf.
- For items that may fall through the wire shelves, use baskets or trays.

Maintenance

To maintain the appearance and longevity of your spacesaver, follow these simple care instructions:

- **Cleaning:** Wipe clean with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals, as these can damage

the satin nickel finish.

- **Inspection:** Periodically check all fasteners to ensure they remain tight. Retighten if necessary.
- **Rust Prevention:** While the finish is rust-resistant, promptly wipe away any standing water to prevent potential corrosion.

Troubleshooting

Problem	Possible Cause	Solution
Unit is wobbly or unstable.	Fasteners are not fully tightened; uneven floor surface; unit not anchored.	Ensure all screws and bolts are securely tightened. Adjust the unit's position on the floor. Consider anchoring the unit to the wall using appropriate hardware (not included).
Unit does not fit over the toilet.	Toilet height or width exceeds clearance; rear support bar obstruction.	Verify your toilet dimensions against the product specifications (33.5 inches clearance for the bottom shelf). Adjust the rear support bar if it's interfering with water lines or valves.
Items fall through wire shelves.	Small items placed directly on wire shelves.	Use baskets, trays, or solid shelf liners to contain smaller items.
