Active Ingredients

The primary active ingredient in Mucinex Maximum Strength is **Guaifenesin (1200 mg)**. Guaifenesin is an expectorant that works by increasing the volume and decreasing the viscosity of secretions in the trachea and bronchi. This action helps to loosen phlegm and bronchial secretions, making it easier to clear them from the airways through coughing.

How Mucinex Works

Mucinex Maximum Strength utilizes a unique bi-layer tablet technology for both immediate and extended release of Guaifenesin. The white layer provides immediate relief, while the blue layer offers extended release, ensuring continuous symptom relief for up to 12 hours. This dual-action mechanism effectively thins and loosens mucus, making coughs more productive and helping to clear chest congestion.
