Campingaz Lumogaz Plus Gas Lamp User Manual

Your guide to safe and efficient operation of your Campingaz Lumogaz Plus Gas Lamp.

1. Introduction

The Campingaz Lumogaz Plus is a compact and reliable gas lamp designed for outdoor use, providing bright illumination for camping, hiking, and other recreational activities. It operates with Campingaz valve cartridges, offering ease of use and portability. This manual provides essential information for the safe setup, operation, and maintenance of your lamp.

2. Safety Information

WARNING: Failure to follow these instructions may result in fire, explosion, or serious injury.

- Use only in well-ventilated outdoor areas. Never use indoors, in tents, or in unventilated spaces.
- Keep away from flammable materials, liquids, and gases.
- Do not touch hot surfaces during or immediately after operation. Allow the lamp to cool completely before handling.
- Ensure the gas cartridge is securely attached and there are no leaks before lighting. Check for leaks using soapy water.
- Keep out of reach of children.
- Do not modify the lamp or use it for purposes other than its intended use.
- Always store the lamp and gas cartridges in a cool, dry place, away from direct sunlight and heat sources.

3. Components

Figure 3.1: Overview of the Campingaz Lumogaz Plus Gas Lamp connected to a Butane/Propane cartridge.

The Campingaz Lumogaz Plus Gas Lamp consists of the following main components:

- **Lamp Head:** Contains the burner, mantle, and glass globe.
- **Control Knob:** Used to regulate gas flow and adjust brightness.
- **Valve Connector:** Connects the lamp head to the gas cartridge.
- **Gas Cartridge (CV 270 Plus, CV 300 Plus, CV 470 Plus):**Provides the fuel (Butane/Propane mix). *(Sold separately)*
- **Mantle:** A fragile fabric mesh that glows brightly when heated by the flame.

- **Carry Handle/Guard:** Metal frame protecting the globe and allowing for transport.

4. Setup

1. **Prepare the Mantle:** If a new mantle is being installed, carefully attach it to the burner nozzle according to the mantle's specific instructions. Burn off the mantle by lighting it with a match or lighter until it turns white and brittle. Allow it to cool completely.
2. **Attach Gas Cartridge:** Ensure the control knob on the lamp is in the OFF position (fully clockwise). Align the lamp's valve connector with the valve on the Campingaz valve cartridge. Push down firmly and twist clockwise until you hear a click and feel it lock into place. Do not overtighten.
3. **Check for Leaks:** After attaching the cartridge, apply a small amount of soapy water to the connection point. If bubbles appear, there is a gas leak. Immediately turn the control knob to OFF, disconnect the cartridge, and re-attach it, ensuring a proper seal. If leaks persist, do not use the lamp and contact customer support.

5. Operating Instructions

1. **Lighting the Lamp:** Ensure the lamp is on a stable, non-flammable surface. Slowly turn the control knob counter-clockwise to allow a small amount of gas to flow. Immediately bring a lit match or lighter to the mantle. The mantle should ignite and begin to glow.
2. **Adjusting Brightness:** Once lit, slowly turn the control knob further counter-clockwise to increase the gas flow and brightness. Turn clockwise to decrease brightness. Do not open the gas fully if the mantle is not glowing properly, as this can cause flaring.
3. **Turning Off the Lamp:** To turn off the lamp, slowly turn the control knob fully clockwise until the flame extinguishes. Ensure the gas flow has completely stopped.
4. **Disconnecting Cartridge:** Only disconnect the gas cartridge when the lamp is completely cool and the control knob is in the OFF position. To disconnect, twist the lamp head counter-clockwise relative to the cartridge until it releases.

6. Maintenance

- **Cleaning:** Clean the exterior of the lamp with a damp cloth. Do not use abrasive cleaners or solvents. Ensure the glass globe is clean for optimal light output.
- **Mantle Replacement:** Mantles are fragile and will eventually break. Replace a broken or damaged mantle with a new Campingaz compatible mantle. Follow the mantle's specific installation instructions. Always ensure the lamp is cool and disconnected from the gas cartridge before replacing the mantle.
- **Storage:** When not in use, disconnect the gas cartridge and store the lamp in its original packaging or a protective case. Store in a cool, dry place, away from direct sunlight and extreme temperatures.

7. Troubleshooting

Problem	Possible Cause	Solution
Lamp won't light	No gas flow; Empty cartridge; Clogged burner; Damaged mantle.	Ensure control knob is open; Replace cartridge; Clean burner nozzle; Replace mantle.
Flickering or weak flame	Low gas pressure; Partially clogged burner; Damaged mantle.	Replace cartridge; Clean burner nozzle; Replace mantle.

Problem	Possible Cause	Solution
Gas leak detected	Improper cartridge connection; Damaged valve seal.	Re-attach cartridge securely; If leak persists, do not use and contact customer support.
Mantle does not glow properly	Mantle not properly burned off; Damaged mantle.	Ensure mantle is fully burned off (white and brittle); Replace mantle.

8. Specifications

- **Model:** Campingaz Lumogaz Plus
- **Model Number:** 204194
- **Dimensions (L x W x H):** Approximately 1 x 1 x 1 cm (excluding cartridge)
- **Weight:** Approximately 270 grams (excluding cartridge)
- **Fuel Type:** Butane/Propane gas mix (Campingaz valve cartridges CV 270 Plus, CV 300 Plus, CV 470 Plus)
- **Material:** Glass (globe), Metal (frame, burner)
- **Color:** Blue (control knob), Silver/Clear (lamp body)
- **Manufacturer:** Coleman FR Sport

9. Warranty and Support

For warranty information and customer support, please refer to the documentation provided with your purchase or visit the official Campingaz website. Keep your proof of purchase for any warranty claims.
For further assistance, you may contact Campingaz customer service through their official channels.
