Vornado 154

Vornado 154 Whole Room Air Circulator Tower Fan User Manual

Model: 154

Important Safety Instructions

Please read all instructions before using this appliance. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.
- Do not operate any fan with a damaged cord or plug. Discard fan or return to an authorized service facility for examination and/or repair.
- Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Do not route cord under furniture or appliances. Arrange cord away from traffic area and where it will not be tripped over.
- Always unplug the fan before moving, cleaning, or when not in use.
- Do not use the fan near water, such as in a wet basement or near a swimming pool.
- Do not insert fingers or foreign objects into any ventilation or exhaust opening.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

Product Overview

The Vornado 154 Whole Room Air Circulator Tower Fan utilizes V-Flow Technology to provide continuous, whole-room air circulation without the need for oscillation. This ensures a consistent and comfortable airflow throughout your space.

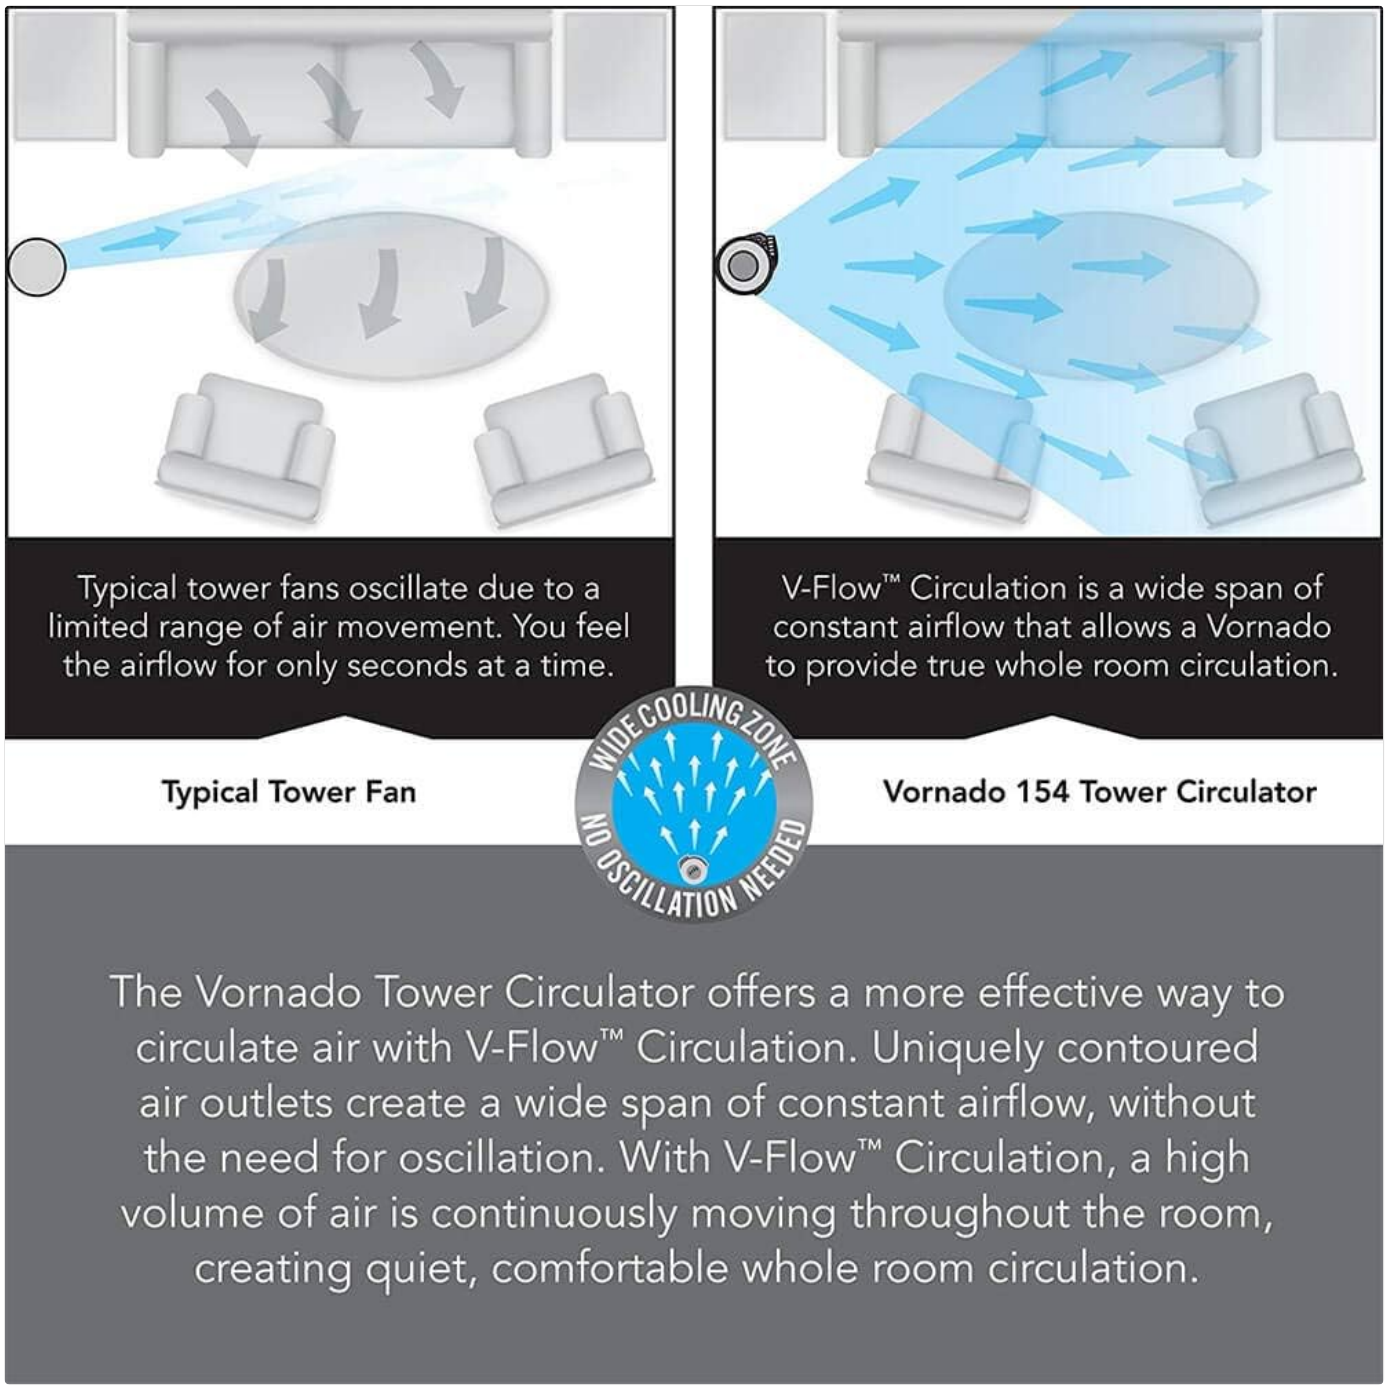

Figure 2: This diagram illustrates the difference between a typical oscillating tower fan, which provides limited, intermittent airflow, and the Vornado 154's V-Flow Circulation, which creates a wide, constant span of airflow for true whole-room circulation.

Setup

1. **Unpack:** Carefully remove the Vornado 154 from its packaging. Retain packaging for off-season storage.
2. **Placement:** Place the circulator in a location where the airflow will not be obstructed. For optimal whole-room circulation, position it in a corner or against a wall, directing the airflow across the room.
3. **Power Connection:** Plug the power cord into a standard 120V AC wall outlet. Ensure the plug is fully inserted.

Operating Instructions

The Vornado 154 features intuitive push-button controls located on the top of the unit, along with a convenient remote control.

Figure 4: Top control panel showing power, speed, and timer buttons.

Power On/Off

- Press the **Power Button** (🔲) to turn the circulator ON or OFF.

Speed Settings

- The Vornado 154 has 4 speed settings. Press the **Speed Button** (🔲) repeatedly to cycle through the speeds: I (low), II (medium-low), III (medium-high), IV (high).
- LED indicators will illuminate to show the selected speed.

Timer Function

- Press the **Timer Button** () to set the circulator to run for a specific duration. Available settings are 1, 2, 4, or 8 hours.
- The corresponding LED will light up to indicate the selected timer duration. The circulator will automatically turn off after the set time expires.

Remote Control

- The included remote control allows you to operate all functions (Power, Speed, Timer) from a distance.
- The remote magnetically cradles to the top of the unit for convenient storage.

Video 1: This manufacturer video provides a general overview of Vornado tower air circulators, demonstrating their design and how they function to move air throughout a room. While it may feature a slightly different model (Vornado 143), the operational principles and benefits of V-Flow circulation are similar to the Vornado 154.

Maintenance

Your Vornado circulator requires little maintenance. Proper cleaning can extend the life of your appliance.

1. **Unplug:** Always unplug the circulator before cleaning.
2. **Cleaning the Exterior:** Use a soft, damp cloth to wipe the exterior surfaces of the circulator. Do not use gasoline, thinners, solvents, or other chemicals for cleaning.
3. **Cleaning the Grilles:** Use a vacuum cleaner with the brush attachment to remove any dust or debris from the air inlet and outlet grilles.
4. **Storage:** During the off-season or periods of non-use, it is recommended to store the circulator in its original box or cover it to protect it from dust.
