Tribest SW-2000-B

Tribest Slowstar SW-2000 Vertical Masticating Cold Press Juicer & Mincer User Manual

1. Introduction

Thank you for choosing the Tribest Slowstar SW-2000 Vertical Masticating Cold Press Juicer & Mincer. This appliance is engineered to provide high-quality, nutrient-rich juice from a variety of fruits and vegetables, while also offering a versatile mincing function. Its slow, cold-press technology minimizes oxidation, preserving the natural flavors and enzymes of your produce. Please read this manual thoroughly before operation to ensure safe and efficient use.

2. Product Overview

The Tribest Slowstar SW-2000 is designed for optimal performance and ease of use. Familiarize yourself with its components:

Figure 2.2: All components of the Tribest Slowstar SW-2000 Juicer, including the motor base, juicing assembly, mincing assembly, pulp and juice containers, cleaning brush, and strainer.

2.1 Key Components

- **Motor Base:** Houses the powerful 200-watt motor with 3-stage speed reduction gears, operating at a slow 47 RPM.
- **Juicing Assembly:** Consists of the hopper, juicing screen, spinning brush, and juice cap.
- **Duo-Blade Ultem Auger:** A double-edged auger made from durable Ultem material, designed for efficient cutting and crushing of produce, reducing jamming and pulp.

Figure 2.3: The innovative Duo-Blade Ultem Auger for superior performance.

- **Mincing Attachment:** An additional assembly that replaces the juicing screen for mincing tasks.

Figure 2.4: The versatile mincing attachment for various recipes.

- **Juice Cap:** Prevents leaks and drips, allowing for easy container switching and pre-rinsing.

Figure 2.5: The convenient juice cap for mess-free operation.

- **Pulp and Juice Containers:** Separate containers for collecting extracted juice and dry pulp.
- **Cleaning Brush:** Included for easy cleaning of the juicing screen and other parts.

3. Setup

Before first use, wash all removable parts with warm, soapy water. Rinse thoroughly and dry. Ensure the motor base is placed on a stable, flat surface.

1. Place the motor base on a clean, dry countertop.
2. Assemble the juicing bowl onto the motor base, aligning the red dots and twisting until it locks into place.
3. Insert the spinning brush and juicing screen into the juicing bowl.
4. Place the Ultem auger into the center of the juicing screen.

5. Attach the hopper (feeding chute) onto the juicing bowl, aligning and twisting to secure.
6. Position the juice and pulp containers under their respective spouts.
7. Ensure the juice cap is closed before starting operation.

4. Operating Instructions

4.1 Juicing

The Slowstar SW-2000 is designed for slow, efficient juice extraction.

1. Prepare your fruits and vegetables by washing them thoroughly. Cut produce into pieces small enough to fit into the feeding chute. Harder produce like carrots may benefit from smaller pieces.
2. Ensure the juice cap is closed.
3. Plug in the juicer.
4. Turn on the power switch.
5. Slowly feed the prepared produce into the chute. The auger will pull the produce down. Use the pusher only if necessary for dense items.
6. Once juicing is complete, turn off the power switch and unplug the unit.
7. Open the juice cap to release any remaining juice.

4.2 Mincing

To use the mincing function, replace the juicing screen and spinning brush with the mincing attachment.

1. Disassemble the juicing screen and spinning brush from the juicing bowl.
2. Insert the mincing attachment into the juicing bowl.
3. Place the Ultem auger into the center of the mincing attachment.
4. Attach the hopper (feeding chute) onto the juicing bowl, aligning and twisting to secure.
5. Prepare ingredients for mincing (e.g., frozen fruit for sorbet, nuts for butter).
6. Plug in the juicer and turn on the power switch.
7. Slowly feed ingredients into the chute.
8. Once mincing is complete, turn off the power switch and unplug the unit.

5. Maintenance and Cleaning

Regular cleaning ensures the longevity and optimal performance of your Slowstar juicer. All removable parts are designed for easy hand washing.

1. **Immediate Rinse:** After juicing, close the juice cap and pour a glass of water into the feeding chute while the motor is still running. This helps pre-rinse the juicing screen and internal components.
2. **Disassembly:** Turn off and unplug the juicer. Disassemble all removable parts: hopper, auger, spinning brush, juicing screen, juicing bowl, and containers.
3. **Hand Wash:** Wash all disassembled parts with warm, soapy water. Use the provided cleaning brush to

thoroughly clean the juicing screen, as pulp can easily get lodged in its fine mesh.

4. **Rinse and Dry:** Rinse all parts under running water to remove soap residue. Allow all parts to air dry completely before reassembling or storing.
5. **Motor Base:** Wipe the motor base with a damp cloth. Do not immerse the motor base in water or rinse it under running water.

6. Troubleshooting

If you encounter issues with your Tribest Slowstar SW-2000, refer to the following common solutions:

Problem	Possible Cause	Solution
Juicer stops or jams during operation.	Overfeeding or hard produce.	Turn off and unplug. Disassemble and clear any lodged produce. Cut produce into smaller pieces and feed slowly.
Low juice yield or wet pulp.	Improper assembly or type of produce.	Ensure all parts are correctly assembled and locked. Some very soft fruits naturally yield more pulp.
Unit does not turn on.	Not properly plugged in or safety lock not engaged.	Check power connection. Ensure juicing bowl and hopper are correctly aligned and locked into place.
Excessive foam in juice.	Certain types of produce (e.g., apples, leafy greens) naturally produce more foam.	Use the included strainer to remove foam if desired.

7. Specifications

Feature	Detail
Model Name	Tribest Slowstar SW-2000 Vertical Masticating Cold Press Juicer
Item Model Number	SW-2000-B
Brand	Tribest
Color	Red
Product Dimensions	8"D x 8"W x 18"H
Item Weight	18 pounds
Motor Power	200 Watts
RPM	47 RPM
Blade Material	Stainless Steel (Auger made of Ultem)
Capacity	1 Liters
Power Source	Corded Electric
Product Care Instructions	Hand Wash Only
