FS FHD-1UFMT-N Modular Cabling System

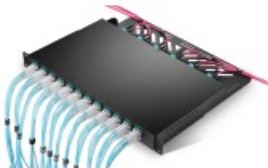

FS various cabling solution system meets the need to optimize existing data center space, enabling organizations to meet business demands for higher data rates while minimizing the costs of space and equipment. From the high density FHD series and the ultra high density FHZ series to the FHU fast deployment series, you can maximize your network manageability and performance.

FHD High Density Series

- Max. 144 Fibers in 1 Rack Unit
- Versatile solution in multiple sizes (1U/2U/4U) and styles for building backbones, data centers and enterprise applications.

FHZ Ultra High Density Series

- Max. 216 Fibers in 1 Rack Unit
- Enables to provide the scalability to increase density as business demands evolve.

FHD High Density Series

The FHD series is a flexible solution designed for easy installation and maintenance. A range of enclosures house FHD series adapter panels, MTP® cassettes, and cable assemblies to offer flexible connection and storage options to meet any project need. Versatile fiber optic patching solutions in multiple sizes and styles for TRs, MDU/residential building backbones and small data centers.

FHD Series Fiber Optic Enclosures

FHD series provides a wide variety of fiber enclosures for all project needs, including 1U, 2U and 4U rack mount and wall mount enclosures. Enclosures feature best-in-class cable management, bend radius control, slack management, and patch field access.

FHD Series Fiber Optic Cassettes

FHD series MTP®/MPO cassettes are for quick and easy deployment in high density applications and provide efficient utilization of rack space and design flexibility. The cassettes interconnect with high density fiber cable assemblies for quick connection of remote or data center applications.
