## 10g Network Adopter

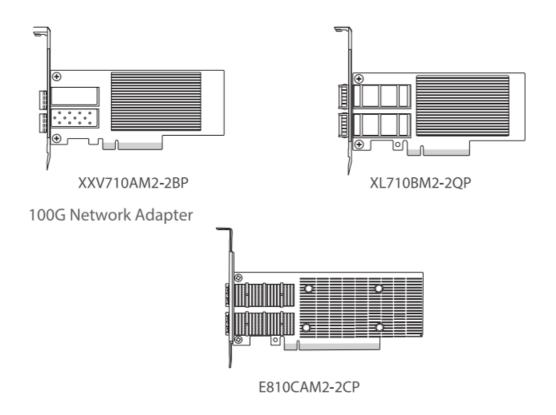

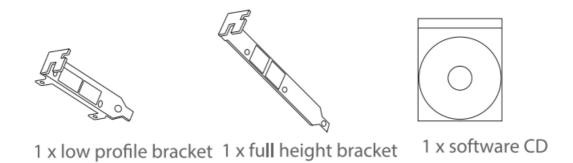

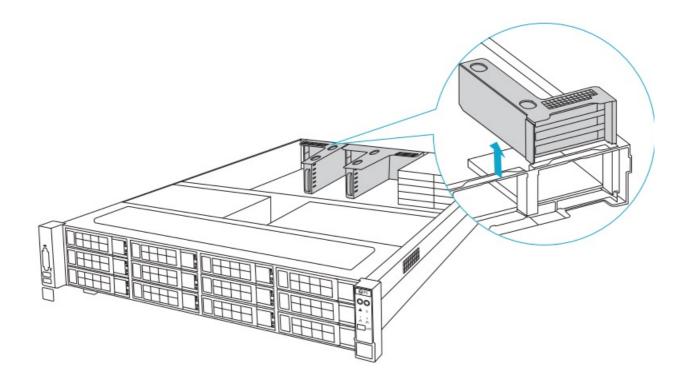

25G/40G Network Adapter

# **Package Contents**

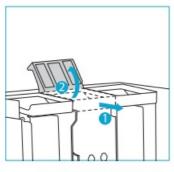

**Pulling the Network Adapter Module Out** 

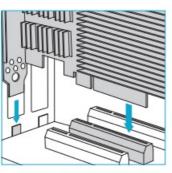

NOTE: Trun off the server and polling the power cord before pulling the module from the server.

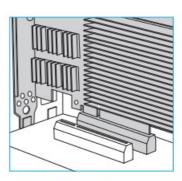

# Inserting the Adapter into the slot

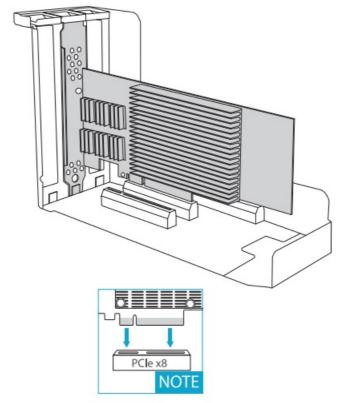

Step 1: Unfold Slot Cover

Step 2: Plug-in Slot Carefully

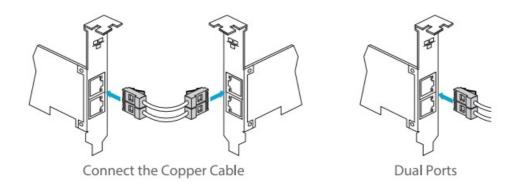

Step 3: Ensure the Adapter Stable

**NOTE**: Insert the adapter into the PCle slot corresponding to the server (eg: PCle x8).

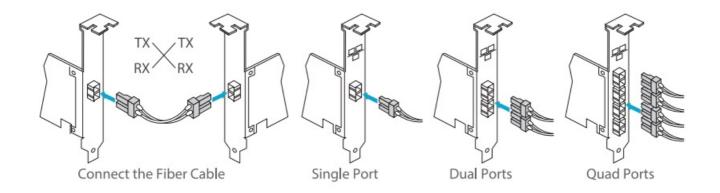

# **Connecting Cable**

RJ- 45 copper Cable 10GBASE- T requires Cat6- Cat6a or Cat7 Cable

# Fiber optical cable

Make sure that the connector is oriented correctly

NOTE: The fiber optic port contains a Class 1 laser device. Do not expose the port as this may result in skin or eye injury.

## **Installing the Windows Driver**

First turn on the computer, and when Windows discovers the new adapter, the "Found New Hardware Wizard" appears. Extract the update package from the CD to a specific path. Open a DOS command box and go to a specific path and type setup at the command prompt to extract the driver.

#### **Checking the State of the Indicator**

Indicator Light	State	Description
INK (Green/Yellow)	Green light	Run at maximum port speed
	Yellow light	Run at a lower port speed
	No light	No link
ACT (Green)	Flashing green light	Data activity
	No light	No link

## **Compliance Information**

#### **FCC**

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not

installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**CAUTION:** Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

Responsible party (only for FCC matter) **FS.COM** Inc. 380 Centerpoint Blvd, New Castle, DE 19720, United States <a href="https://www.fs.com">https://www.fs.com</a>
