Contents

FS X550AT2-T2 Ethernet Network Adapter

Product Information

The product is a network interface card that supports PCIe 2.0/2.1/3.0 standards. It comes in different models such as X550AT2-T2, X710BM2-F2, JL82599EN-F1, FTXL710BM1-F4, XXV710AM2-F2,and FTXL710BM2-QF2, with various port configurations ranging from single port to quad ports. The fiber optic port contains a Class 1 laser device, and caution should be taken not to expose the port to avoid skin or eye injury.
Package Contents

- 1 x software CD

Product Warranty

The product comes with a 3-year limited warranty against defects in materials or workmanship. For more information on the warranty,please visit **https://www.fs.com/policies/warranty.html**.
Product Usage Instructions

1. Before pulling the module from the server, turn off the server and unplug the power cord.
2. Insert the adapter into the PCIe slot corresponding to the server (e.g., PCIe X8).
3. The indicator light LNK (green/yellow) represents the state of the network connection, while the indicator light ACT (green) shows data activity. Refer to the user manual for a detailed description of the different states.
4. If you want to return the product, please follow the instructions provided at **https://www.fs.com/policies/day_return_policy.html**.

Package Contents

1 x low profile bracket

1 x full height bracket

1 x software CD

## Pulling the Network Adapter Module Out

NOTE: Turn off the server and unplug the power cord before pulling the module from the server.

Inserting the Adapter into the Slot

Step 1: Unfold Slot Cover
Step 2: Plug-in Slot Carefully
**Step 3:** Ensure the Adapter Stable

PCIE X8

NOTE

NOTE: Insert the adapter into the PCIE slot corresponding to the server (eg: PCIE X8).
Connecting the Cable

RJ-45 copper cable
10GBASE-T requires Cat6, Cat6a or Cat7 Cable

Connect the Copper Cable   Dual Ports

**Fiber optical cable**

Make sure that the connector is oriented correctly

Connect the Fiber Cable   Single Port   Dual Ports   Quad Ports

NOTE: The fiber optic port contains a Class 1 laser device. Do not expose the port as this may result in skin or eye injury.
Installing the Windows Driver

First turn on the computer, and when Windows discovers the new adapter, the "Found New Hardware Wizard" appears. Extract the update package from the CD to a specific path. Open a DOS command box and go to a specific path and type setup at the command prompt to extract the driver.

Checking the Status of the Indicator

| Indicator Light	State	Description
LNK (Green/Yellow)	Green light	Run at maximum port speed
	Yellow light	Run at a lower port speed
	No light	No link
ACT (Green)	Flashing green light	Data activity
	No light	No link

Product Warranty

FS ensures our customers that any damage or faulty items due to our workmanship, we will offer a free maintenance service.

Warranty: All Ethernet Network Interface Cards enjoy 3 years limited warranty against defect in materials or workmanship. For more details about warranty, please check at **https://www.fs.com/policies/warranty.html**
