Drive Medical SC31050

Drive Medical 18 AH Battery Pack Instruction Manual

Model: SC31050 | Brand: Drive Medical

Introduction

This manual provides essential information for the proper use, installation, and maintenance of your Drive Medical 18 AH Battery Pack. This battery pack is designed as an exact replacement or upgrade for Drive Medical Scout 3 and Scout 4 mobility scooters. It offers reliable power and an extended range for your mobility device.

Setup and Installation

Follow these steps to safely install your new battery pack:

1. **Power Off:** Ensure your Drive Medical Scout 3 or 4 scooter is completely powered off and disconnected from any charging source.
2. **Locate Battery Compartment:** Refer to your scooter's user manual to locate and open the battery compartment. This is typically found under the seat or floorboard.
3. **Remove Old Battery (if applicable):** Carefully disconnect the terminals of the old battery pack. Note the polarity (positive and negative connections) before removal. Lift the old battery pack out.
4. **Insert New Battery:** Place the new Drive Medical 18 AH Battery Pack into the compartment. Ensure it fits securely and is oriented correctly.
5. **Connect Terminals:** Connect the positive (+) terminal of the battery to the positive terminal of the scooter, and the negative (-) terminal of the battery to the negative terminal of the scooter. Ensure connections are firm and secure.
6. **Secure Compartment:** Close and secure the battery compartment.
7. **First Charge:** It is recommended to fully charge the battery pack before its first use.

Operating the Battery Pack

The Drive Medical 18 AH Battery Pack is designed for seamless integration with your Scout 3 or 4 scooter. Once installed, the scooter will draw power directly from the battery. This battery pack is fully charged and ready for use upon arrival.

- **Range:** This battery pack is designed to provide a range of approximately 15 miles, depending on terrain, user weight, and driving conditions.
- **Charging:** The battery pack can be charged using the standard battery charger that originally came with your Drive Medical Scout 3 or Scout 4 scooter. The charger is not included with this battery pack.

Maintenance

Proper maintenance will extend the life and performance of your battery pack:

- **Regular Charging:** Always charge the battery after each use, even if only for a short period. Avoid letting the battery completely discharge.
- **Avoid Overcharging:** While modern chargers typically prevent overcharging, it's good practice to disconnect the charger once the battery is fully charged.
- **Storage:** If the scooter or battery pack will not be used for an extended period (more than two weeks), fully charge the battery and store it in a cool, dry place. Recharge it at least once a month to maintain its capacity.

- **Clean Terminals:** Periodically inspect the battery terminals for corrosion. If present, clean them with a wire brush or a mixture of baking soda and water. Ensure terminals are dry before reconnecting.
- **Temperature:** Avoid exposing the battery to extreme temperatures, both hot and cold, as this can affect performance and lifespan.

Troubleshooting

If you encounter issues with your battery pack, consider the following:

- **Battery Not Charging:**
  - Ensure the charger is properly connected to both the battery pack and a working power outlet.
  - Check the charger's indicator lights (if any) to confirm it is functioning.
  - Inspect the charging port and battery terminals for any damage or debris.
- **Reduced Range/Short Battery Life:**
  - Confirm the battery is being fully charged before each use.
  - Consider the age of the battery. Battery capacity naturally diminishes over time.
  - Factors like terrain, user weight, and frequent stops/starts can affect range.
- **Unusual Odor or Swelling:**
  - Immediately discontinue use and disconnect the battery if safe to do so.
  - Contact Drive Medical customer support for assistance. Do not attempt to repair the battery yourself.

For issues not covered here, please contact Drive Medical customer support.

Specifications

Feature	Detail
Model Number	SC31050
Battery Capacity	18 Amp Hours
Battery Cell Composition	Sealed Lead Acid
Product Dimensions	7.13 x 2.99 x 6.57 inches
Weight	Approximately 0.01 ounces (Note: This weight is likely incorrect in source data, actual battery weight is significantly higher)
Recommended Use	Scooter (Drive Medical Scout 3 or 4)
Manufacturer	Drive Medical

Warranty and Support

This Drive Medical 18 AH Battery Pack comes with a **one-year manufacturer guarantee** from the date of purchase. This warranty covers defects in materials and workmanship under normal use.
For warranty claims, technical support, or any questions regarding your battery pack, please contact Drive Medical customer service. Refer to the contact information provided with your original scooter or visit the official Drive Medical website for current

support details.
Please retain your proof of purchase for warranty purposes.
