Denali Pure WF-644845-3PK-DL23

Denali Pure Refrigerator Water Filter Instruction Manual

MODEL: WF-644845-3PK-DL23

Product Overview

This manual provides instructions for the Denali Pure replacement refrigerator water filter. This filter is designed to provide clean, filtered water for your refrigerator's water and ice dispenser.

Compatibility: This Denali Pure filter is compatible with refrigerators requiring Bosch B30BB830SS, Bosch ULTRACLARITY, and 644845 fridge water filter cartridges.

Setup and Installation

Follow these steps to properly install your new Denali Pure refrigerator water filter. Refer to your refrigerator's specific manual for exact filter housing location and removal instructions if needed.

1. **Locate Filter:** Identify the current water filter in your refrigerator. This is typically located in the upper right corner of the fresh food compartment, in the base grille, or behind the fresh food crisper drawer.

2. **Turn Off Water Supply:** For safety, turn off the water supply to your refrigerator. This is usually done via a shut-off valve behind the refrigerator or under the sink.
3. **Remove Old Filter:** Depending on your refrigerator model, twist the old filter counter-clockwise or push a release button to remove it. Be prepared for a small amount of water to drip out.
4. **Prepare New Filter:** Remove the new Denali Pure filter from its packaging. Remove any protective caps or covers.
5. **Install New Filter:** Insert the new filter into the filter housing. Twist clockwise or push firmly until it locks into place. Ensure a secure fit to prevent leaks.
6. **Restore Water Supply:** Turn the water supply back on to your refrigerator.
7. **Flush the System:** Dispense approximately 2-3 gallons of water through the refrigerator's dispenser to flush out air and any loose carbon particles. This may take about 5 minutes. The water may appear cloudy or discolored initially; this is normal. Continue flushing until the water runs clear.
8. **Reset Filter Indicator:** Most refrigerators have a filter change indicator light. Refer to your refrigerator's manual for instructions on how to reset this light. Typically, this involves pressing and holding a 'Filter' or 'Reset' button for a few seconds.

Operating Instructions

Once installed and flushed, the Denali Pure water filter operates automatically, providing filtered water and ice. No further user interaction is required for its daily operation.

- Ensure the refrigerator's water supply is consistently on.
- Regularly check the water dispenser for proper flow.
- If water flow significantly decreases, it may indicate the filter is nearing the end of its service life.

Maintenance

To ensure optimal performance and water quality, it is recommended to replace your Denali Pure refrigerator water filter every 6 months, or sooner if water flow noticeably decreases.

- **Replacement Schedule:** Mark your calendar or set a reminder for filter replacement every six months.
- **Post-Replacement Flushing:** Always flush the new filter as described in the 'Setup and Installation' section after each replacement.
- **External Cleaning:** Keep the exterior of the filter housing clean.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Slow water flow from dispenser	Clogged filter, air in system, low water pressure	Replace filter if it's old. Flush the system thoroughly. Check household water pressure.
Cloudy or discolored water	Air in system, new filter carbon particles	Flush 2-3 gallons of water through the dispenser until clear. This is normal for new filters.
Water leaks from filter area	Improperly installed filter, damaged O-rings	Ensure filter is securely seated and twisted into place. Remove and re-install. Check O-rings for damage.
Filter indicator light remains on after replacement	Indicator not reset	Refer to your refrigerator's manual for specific instructions on how to reset the filter indicator light.

Specifications

- **Brand:** Denali Pure
- **Model Number:** WF-644845-3PK-DL23
- **UPC:** 754672814112
- **Unit Count:** 3.0 Count (filters)
- **External Testing Certification:** ANSI, NSF, WQA
- **Compatibility:** Replacement for Bosch B30BB830SS, ULTRACLARITY, 644845
