## Troubleshooting Common Issues

While the K568 polo is designed for durability, here are some common issues and how to address them:

- **Shrinking:** This polo is designed to resist shrinking. To prevent any potential shrinkage, always wash in cold water and tumble dry on a low heat setting. High heat can cause synthetic fibers to contract.
- **Fading:** To maintain color vibrancy, wash with like colors and avoid harsh detergents or bleach. Turn the garment inside out before washing to protect the outer surface.
- **Pilling:** Pilling (small balls of fiber on the fabric surface) can occur with wear and friction. To minimize pilling, wash the polo inside out and avoid washing with abrasive items like towels or jeans. A fabric shaver can be used to gently remove existing pills.
- **Odor Retention:** Although the polo has odor-controlling technology, persistent odors can sometimes occur. Ensure the polo is thoroughly dried after washing and avoid leaving it damp for extended periods. Consider using a sports detergent designed for synthetic fabrics.
