SUNUV SUN3

SUNUV SUN3 Professional UV LED Nail Lamp Instruction Manual

Model: SUN3

Introduction

The SUNUV SUN3 Professional UV LED Nail Lamp is designed for efficient and effective curing of all types of gel nail polishes. Featuring advanced dual optical wavelength technology, smart sensor activation, and multiple timer settings, this lamp provides a professional-grade nail curing experience for both home and salon use.

What's in the Box

- SUN3 Nail Lamp
- 1.5m Power Adaptor
- User Manual
- Gel Polish Application Manual

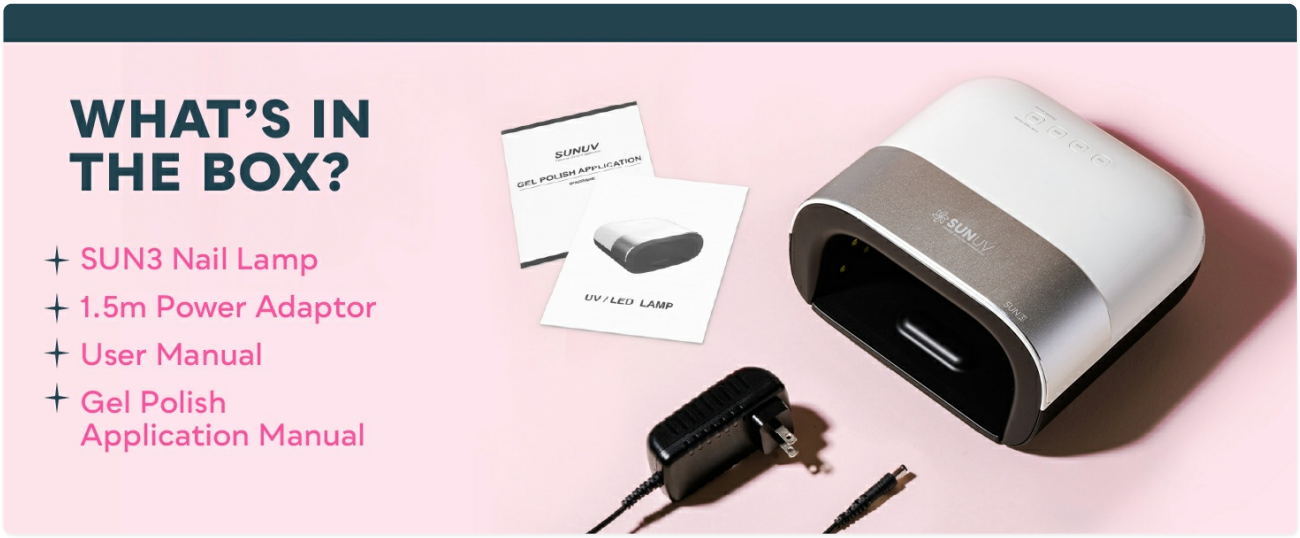

Image: The SUNUV SUN3 Nail Lamp, its power adapter, and accompanying user manuals are neatly displayed, indicating the complete package contents.

Setup

1. Unpack the SUNUV SUN3 Nail Lamp and all accessories.
2. Connect the 1.5m Power Adaptor to the lamp's power port.
3. Plug the power adaptor into a suitable electrical outlet. The lamp is now ready for use.

Operating Instructions

- **Power On/Off**: The lamp features a smart sensor. Simply slide your hand or foot into the curing area to automatically activate the lamp. Removing your hand or foot will turn off the lights.
- **Timer Settings**: Select desired curing time using the buttons on top of the lamp:
  - **10s**: For quick flash curing or thin coats.
  - **30s**: Standard curing time for most gel polishes.
  - **60s**: Extended curing time for thicker coats or specific gels.
  - **99s Low Heat Mode**: Gradually increases power to prevent heat spikes, ideal for builder gels and hard gels, protecting sensitive skin.
- **Double Power Mode**: Activate this mode (often integrated with 99s or a separate button) for faster curing speeds, up to twice as fast as standard UV LED lamps.
- **Dual Optical Wavelength Technology**: Equipped with 39 LED beads utilizing dual optical wavelength (365nm + 405nm), ensuring compatibility with all UV and LED gel nail polishes, including base coat, top coat, color gel, hard gels, builder gels, acrylics, and gem glue.
- **Spacious Design**: The wide curing zone accommodates all five fingernails or toenails simultaneously for convenience.
- **Removable Base**: The magnetic removable base allows for easy cleaning and is suitable for both manicures and pedicures.

Gel Polish Application Guide

For optimal results, follow these general steps for gel polish application:

1. **Prep**: Clean and prepare nails. Apply a thin layer of base coat, ensuring it does not touch the cuticle or skin.
2. **Cure Base Coat**: Place nails under the SUNUV SUN3 lamp and cure according to the base coat manufacturer's instructions, typically 30-60 seconds. The base coat may remain slightly sticky; this is normal and helps subsequent layers adhere.
3. **Color Application**: Apply a thin, even layer of your chosen color gel polish. Cap the free edge of the nail.
4. **Cure Color Coat**: Place nails under the lamp and cure for the recommended time (e.g., 30-60 seconds) as per the gel polish manufacturer's instructions. Repeat for a second color coat if desired.
5. **Top Coat Application**: Apply a thin layer of top coat, ensuring full coverage and capping the free edge.
6. **Final Cure**: Cure the top coat under the lamp for the recommended time (e.g., 60-90 seconds). The top coat should be fully cured and dry.

7. **Cleanse (if necessary)**: If the top coat leaves a sticky residue, gently wipe with rubbing alcohol or a gel cleanser to reveal a high-shine finish.

Important Notes for Gel Curing:

- It is normal for the base coat and color gel to be slightly sticky after drying; this helps layers adhere.
- Only the top coat will be fully cured and dried to a non-tacky finish.
- Avoid applying gel polish too thick to prevent stinging or improper curing.
- Ensure your polish is compatible with UV/LED lamps.

Maintenance

- **Cleaning**: Regularly wipe the lamp's exterior and interior with a soft, dry cloth. For stubborn spots, use a slightly damp cloth with mild soap, then dry thoroughly.
- **Storage**: Store the lamp in a cool, dry place away from direct sunlight when not in use.
- **Bulb Replacement**: The 39 LED beads are designed for a 50,000-hour lifetime and do not require replacement.

Troubleshooting

- **Lamp Not Turning On**:
  - Check if the power adapter is securely plugged into both the lamp and the electrical outlet.
  - Ensure the electrical outlet is functional.
- **Gel Not Curing Properly**:
  - Verify that the gel polish is compatible with UV/LED lamps.
  - Ensure thin, even coats are applied. Thick coats may not cure completely.
  - Confirm the correct curing time is selected based on the gel polish manufacturer's recommendations.
  - Make sure hands are placed correctly inside the lamp, covering all nails evenly.
- **Heat Spikes/Burning Sensation**:
  - Use the 99s Low Heat Mode, which gradually increases power to minimize heat.
  - Apply thinner layers of gel polish.
  - Remove hand briefly if discomfort occurs, then reinsert.

Specifications

Feature	Detail
Brand	SUNUV
Model	SUN3
Lamp Type	UV LED Nail Curing Lamp
Light Source Type	LED
Number of Light Sources	39
Dual Wavelength	365nm + 405nm
Wattage	28.8 watts
Voltage	24 Volts (DC)
Control Method	Touch
Sensor Technology	Proximity (Smart Sensor)
Timer Settings	10s, 30s, 60s, 99s (Low Heat Mode)
Double Power	Yes
Removable Base	Yes
Item Weight	1.96 pounds
Product Dimensions	8.4"D x 8"W x 4.3"H
Material	Acrylic
Finish Type	Painted
Color	White
Lifetime	50,000 hours (LED beads)
Is Cordless?	No (Corded Electric)
Water Resistance Level	Not Water Resistant
First Available	March 12, 2017
