Your Ranch Concert Ukulele kit includes the ukulele itself and a comprehensive set of accessories to get you started.

Setup Guide

1. Initial Tuning

New ukulele strings, especially nylon ones, tend to stretch and go out of tune frequently during the first few days of use. This is normal. Tune your ukulele before each playing session until the strings settle. The included digital clip-on tuner makes this process simple and accurate.

1. Clip the digital tuner onto the headstock of your ukulele.
2. Pluck each string individually. The tuner display will show the note being played.
3. Adjust the corresponding tuning peg until the tuner indicates the correct note (G-C-E-A for standard ukulele tuning) and the screen turns green, signifying it is in tune.
4. Repeat for all four strings.

The included digital clip-on tuner makes tuning easy. Attach it to the headstock and pluck each string. The screen will turn green when the note is in tune.

2. Attaching the Strap

The included strap can be attached to the strap buttons on your ukulele for comfortable playing while standing or to provide extra support while seated. Secure one end of the strap to the button at the bottom of the ukulele body and the other end to the button near the neck joint.

3. Online Lessons

Your kit includes access to 12 online video lessons. These step-by-step lessons are designed to guide beginners through the fundamentals of playing the ukulele. Refer to the instruction card included in your kit for details on how to access these valuable resources.

Operating Your Ukulele

Playing Your Ukulele

The Ranch Concert Ukulele is designed for comfortable playability. Its 23-inch size is ideal for adults and features wider-spaced frets, making it easier for beginners to form chords. Hold the ukulele comfortably against your body, supporting the neck with your left hand (if right-handed) and using your right hand for strumming or plucking the strings.

The 23-inch concert size is comfortable for both beginners and intermediate players.

Sound Quality

The acoustic Concert ukulele's arched back design is a key feature contributing to its superior sound. This design provides longer sustain and fuller, warmer tones compared to ukuleles with flat backs. The soft and smooth Aquila strings resonate clearly, offering a bright and distinctive tone perfect for solo playing, singing along, or jamming.

The ukulele's arched back design contributes to a fuller, warmer tone and longer sustain.

Comfortable Design

The Ranch Concert Ukulele is built with player comfort in mind. Its 23-inch size is manageable, and the fretboard is designed to be smooth on all sides, with well-polished frets. The neck is securely connected, making it easy to navigate the fretboard whether you are playing chords or single notes.

Designed for comfort, the 23-inch body and well-spaced frets make playing enjoyable.

Maintenance and Care

Proper care will ensure the longevity and optimal performance of your Ranch Concert Ukulele.

- **Cleaning:** Use the provided microfiber polishing cloth to gently wipe down the ukulele body and neck after each use to remove fingerprints and dust. Avoid abrasive cleaners or harsh chemicals.
- **String Replacement:** Over time, strings can wear out or lose their vibrancy. Use the extra set of Aquila strings included in your kit for replacement. Refer to online tutorials or a professional for guidance on changing ukulele strings if you are unsure.
- **Storage:** Always store your ukulele in the included padded gig bag when not in use. This protects it from dust, humidity fluctuations, and accidental bumps. Avoid leaving the ukulele in direct sunlight or extreme temperatures.

The included padded gig bag protects your ukulele during transport and storage.

Troubleshooting

Ukulele Not Staying in Tune

This is a common issue, especially with new ukuleles and nylon strings. Nylon strings stretch significantly when new. Continue to tune your ukulele frequently (before each playing session) for the first few days or even weeks. The strings will eventually settle and hold their tune much better. Ensure the chrome die-cast tuning pegs are tightened sufficiently to prevent slippage.

Muffled or Weak Sound

If your ukulele's sound seems muffled or lacks resonance, check the following:

- **String Tension:** Ensure all strings are tuned to the correct pitch. Loose strings will produce a dull sound.
- **Bridge Placement:** Verify that the bridge is correctly seated and not lifting.

- **Playing Technique:** Experiment with different strumming or plucking techniques. Ensure you are not muting the strings unintentionally.
