Troubleshooting

If you encounter issues with your adapter, try the following solutions:

Problem	Possible Cause	Solution
Device not receiving power/charging	• Adapter not properly connected. • Power outlet is not active. • Device power input issue. • Adapter malfunction.	• Ensure all connections (adapter to device, adapter to wall) are secure. • Test the power outlet with another device. • Verify the device's power input port is not damaged. • If issues persist, contact customer support.
Adapter feels unusually hot	• Normal operation (slight warmth). • Overload or internal fault.	• A slight warmth is normal.
