PKPOWER Replacement Power Cord

PKPOWER Replacement Power Cord Instruction Manual

For Remington Shaver Models: R-200s, R-225, R-400, R-405, R-425

1. Introduction

This manual provides essential instructions for the safe and effective use of your PKPOWER Replacement Power Cord. This power cord is designed to provide reliable power to specific Remington shaver models. Please read this manual thoroughly before use and retain it for future reference.

2. Product Overview

The PKPOWER Replacement Power Cord is a durable and certified power supply cable for compatible Remington electric shavers. It features a standard Type A AC plug for wall outlets and a specialized connector designed to fit the charging port of the specified shaver models. The coiled design helps manage cable length and prevent tangles.

3. Compatibility

This PKPOWER Replacement Power Cord is specifically designed for use with the following Remington Shaver models:

- Remington R-200s
- Remington R-225
- Remington R-400
- Remington R-405
- Remington R-425

Ensure your shaver model is listed above to guarantee proper function and safety.

4. Setup

1. **Inspect the Cord:** Before each use, visually inspect the power cord for any signs of damage, such as cuts, frayed wires, or bent pins. Do not use a damaged cord.
2. **Connect to Shaver:** Locate the charging port on your Remington shaver. Gently insert the shaver-compatible connector of the PKPOWER cord into the shaver's charging port. Ensure a snug and secure fit.
3. **Connect to Power Outlet:** Plug the standard Type A AC plug into a functional wall power outlet (100-240V, 50-60Hz).

5. Operating Instructions (Charging)

Once the power cord is properly connected to both the shaver and a power outlet, your Remington shaver should begin charging. Refer to your shaver's original instruction manual for specific charging indicators (e.g., LED lights) and recommended charging times.

- **Charging Time:** Charging times vary by shaver model and battery level.
- **Overcharging:** Modern shavers typically have built-in overcharge protection. However, it is generally recommended to disconnect the shaver once fully charged to conserve energy.
- **Disconnection:** To disconnect, first unplug the AC plug from the wall outlet, then gently remove the connector from the shaver.

6. Maintenance

Proper care will extend the life of your PKPOWER Replacement Power Cord:

- **Cleaning:** Wipe the cord with a dry, soft cloth. Do not use liquid cleaners or immerse the cord in water.
- **Storage:** Store the cord in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tightly wrapping the cord around itself or other objects, as this can stress the wires.
- **Handling:** Always grasp the plug when inserting or removing the cord from an outlet or shaver. Do not pull on the cable itself.
