1. Product Overview

The PK Power DC Extension Power Supply Cord Cable is designed to extend the reach of your existing power adapter for compatible Altec Lansing multimedia computer speaker systems. This cable provides additional length, allowing for more flexible placement of your speakers.

2. Safety Information

Please read and understand the following safety guidelines before using the extension cable:

- Ensure the extension cable is compatible with your device's power requirements (13V 2A DC for specified Altec Lansing models). Using an incompatible cable may cause damage.
- Do not expose the cable to water, excessive moisture, or extreme temperatures.
- Avoid placing heavy objects on the cable or kinking it sharply, as this can damage the internal wiring.
- Do not attempt to modify or repair the cable. Contact customer support if the cable is damaged.
- Keep out of reach of children and pets.

3. Setup and Connection

Follow these steps to properly connect the DC extension cable to your Altec Lansing speaker system:

1. **Identify Connectors:** The extension cable has a male connector on one end and a female connector on the other. The male connector plugs into the power adapter, and the female connector receives the male plug from the speaker system.
2. **Connect to Power Adapter:** Take the male end of the PK Power DC Extension Cable and firmly insert it into the DC output port of your Altec Lansing speaker system's power adapter.
3. **Connect to Speaker System:** Take the female end of the PK Power DC Extension Cable and firmly insert the male power plug from your Altec Lansing speaker system into it.
4. **Verify Connection:** Ensure both connections are secure and fully seated to prevent intermittent power supply.

4. Operation

The PK Power DC Extension Cable is a passive component designed to simply extend the physical reach of your power supply. Once properly connected, it does not require any specific operational steps. The power flow from your adapter to your speaker system will be extended through the cable.

For instructions on operating your Altec Lansing speaker system, please refer to the user manual provided with your speaker system.

5. Maintenance and Care

To ensure the longevity and proper function of your extension cable, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the cable with a dry, soft cloth to remove dust. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use, coil the cable loosely and store it in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the cable for any signs of damage, such as cuts, fraying, or bent connectors. Discontinue use if damage is observed.
- **Handling:** Always grasp the connector ends when plugging or unplugging the cable, rather than pulling on the cable itself.

6. Troubleshooting

If you encounter issues while using the extension cable, consider the following:

- **No Power to Speakers:**
  - Ensure both ends of the extension cable are securely connected.
  - Verify that the original power adapter is functioning correctly and receiving power from the wall outlet.
  - Check the extension cable for any visible damage. If damaged, discontinue use.
- **Intermittent Power:**
  - Re-seat all connections firmly.
  - Ensure the connectors are clean and free of debris.

If troubleshooting steps do not resolve the issue, please contact customer support.
