1. Introduction

The Q-Stoves Q-Flame Wood Pellet Outdoor Heater is an innovative, eco-friendly heating solution designed for patios, camping, and off-grid use. This portable heater operates on wood pellets, offering a cost-effective and sustainable alternative to traditional propane or electric heaters. Its gravity-fed design requires no electricity, making it ideal for various outdoor settings. This manual provides essential information for the safe and efficient setup, operation, and maintenance of your Q-Flame heater.

2. Safety Information

Please read and understand all safety warnings and instructions before operating this heater. Failure to follow these instructions may result in fire, explosion, property damage, personal injury, or death.

- **Outdoor Use Only:** This heater is designed for outdoor use in well-ventilated areas. Never use indoors or in enclosed spaces.
- **Clearances:** Maintain adequate clearance from combustible materials. Refer to local building codes and fire regulations.
- **Hot Surfaces:** The heater surfaces become extremely hot during operation and remain hot for a significant period after use. Always use caution.
- **Children and Pets:** Keep children and pets at least 3 feet (1 meter) away from the heater during operation and for at least 60 minutes after the fire has extinguished to allow for proper cool-down.
- **Glass Tube Handling:** Glass tube removal requires certified heat-resistant gloves. Never contact glass tubes while the fire is burning or when they are hot.
- **Fuel:** Use only approved wood pellets as fuel. Do not use gasoline, kerosene, lighter fluid, alcohol, or other highly volatile liquids to start or rekindle the fire.
- **Stability:** Ensure the heater is placed on a stable, level, non-combustible surface.
- **Supervision:** Never leave a burning heater unattended.

3. Setup & Assembly

Follow these steps to assemble your Q-Stoves Q-Flame Wood Pellet Outdoor Heater. Refer to the provided assembly videos for visual guidance.

3.1 Package Contents

Before assembly, ensure all parts are present:

- Main Body / Base Unit
- Pellet Hopper
- Combustion Barrel / Firepot
- Glass Panels (4 pieces)
- Silicone Sheets / Gaskets (8 pieces)
- Glass Brackets (4 pieces)
- Upper Cover / Top Panel
- Chimney Sections (various)
- Heat Deflector / Top Hat
- Ash Tray
- Wheels (4, 2 lockable)
- Poker / Damper Handle
- Assorted Fasteners (screws, bolts, wrenches)

3.2 Assembly Steps

1. **Install the Wheels:** Attach the four universal wheels to the bottom of the main body. Ensure the two lockable wheels are placed at the back for stability.
2. **Prepare the Main Body:** Remove the partition from the top of the main body using the provided wrench, then turn it over and re-secure it.
3. **Attach Glass Brackets:** Use the removed screws to lock the four glass brackets with the center bulkhead. Pay attention to the correct direction.
4. **Secure Furnace Separator:** Use 4 M6*15 countersunk hexagon socket screws to lock the furnace separator. Note the orientation of the hole shown in the diagram.
5. **Insert Glass Panels:** Carefully slide the glass panels into the bracket slots.
6. **Secure Glass with Silicone:** Place 8 silicone sheets into the holder slots to secure the glass panels.
7. **Attach Upper Cover:** Use 4 M6*15 countersunk hex socket screws to lock the upper cover.
8. **Place Ash Tray:** Insert the ash tray into the middle of the card slot inside the main body.
9. **Install Combustion Barrel:** First, snap the handle into the combustion barrel. Then, tilt the burning barrel up into the main body and lay it flat down on the card position. Finally, remove the handle.
10. **Attach Pellet Hopper:** Secure the pellet hopper to the side of the main body.
11. **Assemble Chimney Sections:** Connect the chimney sections and attach them to the top of the main body.
12. **Install Heat Deflector:** Place the heat deflector (top hat) onto the top chimney section.
13. **Attach Poker:** Hang the poker on the side of the pellet hopper for easy access.

4. Operating Instructions

Follow these steps to safely operate your Q-Stoves Q-Flame heater:

1. **Fill Pellet Hopper:** Open the pellet hopper lid and fill it with dry wood pellets. The hopper holds approximately 20 lbs of pellets, providing 3-5 hours of burn time.
2. **Prepare for Ignition:** Push the shut-off lever down (located on the side of the pellet hopper) to allow pellets to fall into the firepot.
3. **Ignite Pellets:** Open the door of the main body. Squirt a small amount of lighter fluid or gel onto the pellets in the firepot, or place a fire starter cube (e.g., alcohol cube, tumbleweed style) among the pellets. Ignite with a butane lighter or match.
4. **Close Door:** Once ignited, close the door and ensure the firepot is secure.
5. **Place Glass Tube:** Carefully place the glass tube over the burn pot.
6. **Adjust Airflow:** Use the main air damper control to increase or decrease the draw, and the firepot control to rapidly increase temperature.
7. **Enjoy:** The heater will reach full burn in approximately 15-20 minutes. When fully fueled, it can burn continuously for 2.5-3 hours.

5. Maintenance

Regular maintenance ensures optimal performance and longevity of your Q-Flame heater.

- **Ash Removal:** After each use, allow the heater to cool completely. Remove the ash tray and dispose of the ash properly. Thoroughly clean out any residue.
- **Pellet Storage:** Store wood pellets in sealed, dry containers to prevent moisture absorption. Damp pellets can lead to excessive smoke and inefficient burning.
- **Glass Cleaning:** Clean the glass panels regularly with a non-abrasive glass cleaner suitable for high-temperature glass to maintain clear visibility of the flames.
- **General Inspection:** Periodically inspect all components for wear and tear, especially fasteners and seals. Replace any damaged parts immediately.

6. Troubleshooting

Here are solutions to common issues you might encounter:

- **Excessive White Smoke:** This usually indicates damp pellets. Ensure you are using dry wood pellets and storing them in sealed containers.
- **Small or Weak Flame:** If the flame is small or struggling, add an additional alcohol starter cube or a small amount of lighter gel to boost ignition. Ensure sufficient airflow by adjusting the damper.
- **Uneven Pellet Burn:** Some users report uneven burning or smoking with certain pellet types. Using Fir/Pine pellets

or a hardwood Fir/Pine mix is often recommended for hotter, cleaner burns with finer ash.

- **Difficulty Igniting:** Ensure the firepot is not overloaded with pellets initially. Use a small amount of pellets around the igniter, making sure not to cover it completely.
