Hoggar by Okoru G01ME0028

Hoggar by Okoru Premium Metal Storage Shed 5.44 m2 Instruction Manual

Model: G01ME0028

1. Introduction

Thank you for choosing the Hoggar by Okoru Premium Metal Storage Shed. This manual provides essential information for the safe and correct assembly, operation, and maintenance of your new storage shed. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

2. Safety Information

Your safety and the safety of others are paramount. Failure to follow these safety instructions may result in injury or damage to the product.

- Always read and understand all instructions before attempting assembly.
- Wear appropriate personal protective equipment, including heavy-duty gloves and eye protection, during assembly to prevent cuts and scrapes from sharp metal edges.
- Assembly requires at least two adults. Do not attempt to assemble the shed alone.
- Ensure the assembly area is clear of obstructions and children or pets.
- Select a level and stable foundation for the shed. An uneven foundation can compromise the shed's structural integrity and door operation.
- Do not assemble the shed in strong winds or adverse weather conditions.
- Securely anchor the shed to its foundation immediately after assembly to prevent wind damage.
- Keep all plastic bags and small parts away from children.

3. Package Contents

Verify that all components are present before beginning assembly. If any parts are missing or damaged, contact customer support.

- Galvanized metal wall panels
- Roof panels and support beams
- Base frame components

- Double sliding door assembly
- Ventilation components
- Hardware kit (screws, nuts, washers, bolts)
- Assembly instructions (separate document, if applicable)

4. Setup and Assembly Instructions

The assembly of this metal storage shed requires careful attention to detail and adherence to the provided diagrams. It is strongly recommended that two adults perform the assembly.

4.1 Preparation

- Choose a suitable location for your shed, ensuring it is level and has adequate drainage.
- Gather necessary tools: work gloves, safety glasses, screwdriver (Phillips and flathead), adjustable wrench, measuring tape, step ladder, and a drill (optional, for pilot holes).
- Unpack all components and organize them by part number.

4.2 Foundation

A solid, level foundation is critical for the stability and longevity of your shed. Options include a concrete slab, paved area, or a treated timber frame. Ensure the foundation is perfectly level and square to prevent issues with door alignment and structural integrity.

4.3 Assembly Steps

1. **Base Frame Assembly:** Begin by assembling the base frame according to the detailed diagrams in your separate assembly guide. Ensure all corners are square and fasteners are tightened.
2. **Wall Panel Installation:** Attach the wall panels to the base frame, working systematically around the shed. Pay close attention to the orientation of each panel and the overlap for weather sealing.
3. **Door Frame and Doors:** Install the door frame components, ensuring it is plumb and square. Then, carefully mount the double sliding doors onto their tracks. Test their movement to ensure smooth operation.
4. **Roof Assembly:** Install the roof support beams, followed by the roof panels. Ensure all roof panels overlap correctly to prevent water ingress.
5. **Ventilation and Finishing:** Attach the integrated ventilation components and any remaining trim pieces.
6. **Securing the Shed:** Once fully assembled, anchor the shed securely to your chosen foundation using appropriate anchoring hardware (not always included). This step is crucial for stability, especially in windy conditions.

Image: Key features of the shed, including accessibility with 162 cm high sliding doors, skylight for natural light, and four drains for water collection.

5. Operating Instructions

The Hoggar by Okoru Metal Storage Shed is designed for straightforward use.

- **Sliding Doors:** The shed features double sliding doors (117 cm wide x 162 cm high) for easy access. To open, gently slide the doors along their tracks. Ensure the tracks are clear of debris for smooth operation.
- **Ventilation:** Integrated ventilation is designed to promote air circulation within the shed, helping to reduce condensation and maintain a suitable environment for stored items. Do not block these vents.

6. Maintenance

The Hoggar by Okoru Metal Storage Shed is designed for low maintenance due to its galvanized steel construction.

- **Cleaning:** Periodically clean the exterior surfaces with mild soap and water to remove dirt and debris. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Fasteners:** Annually inspect all screws, nuts, and bolts to ensure they remain tight. Re-tighten any loose fasteners to maintain structural integrity.
- **Door Tracks:** Keep the door tracks clear of leaves, dirt, and other debris to ensure smooth door operation. Lubricate tracks with a silicone-based spray if doors become stiff.
- **Corrosion Check:** Although designed with anti-corrosion properties, regularly inspect the shed for any signs of rust, especially in areas prone to moisture accumulation. Address any minor rust spots promptly with appropriate metal treatment.

7. Troubleshooting

Refer to these common issues and solutions before contacting customer support.

- **Difficulty Assembling:** Ensure all parts are correctly identified and oriented according to the assembly diagrams. Verify that the foundation is perfectly level and square. Two-person assembly is highly recommended to manage large panels.
- **Doors Not Sliding Smoothly:** Check the door tracks for any obstructions (dirt, debris, bent metal). Ensure the shed is level and square, as an uneven structure can cause door misalignment. Lubricate the tracks with a suitable spray if needed.
- **Water Leakage:** Inspect all panel overlaps and roof seams to ensure they are correctly aligned and securely fastened. Verify that all screws are tight. Check the foundation for proper drainage to prevent water pooling around the base.
- **Missing or Damaged Parts:** If you discover any missing or damaged components upon unpacking, do not proceed with assembly. Contact Hoggar by Okoru customer support immediately for assistance.

8. Specifications

Brand	Hoggar by Okoru
Model Number	G01ME0028
Exterior Dimensions (L x W x H)	192 cm x 282 cm x 222 cm
Material	Galvanized Steel (0.25 mm panels), Alloy Steel frame
Door Dimensions (W x H)	117 cm x 162 cm (Double Sliding Door)
Weight	77 kg (approx. 169.76 lbs)
Water Resistance	Waterproof
Assembly Required	Yes
