Intex 28413WL

Intex PureSpa 4 Person Octagonal Inflatable Hot Tub Spa

Model: 28413WL | Brand: Intex

Introduction

The Intex PureSpa provides a relaxing spa experience for up to 4 people. Featuring Fiber-Tech construction and a durable 3-ply laminated material, this octagonal inflatable hot tub offers comfort, support, and durability. It includes 120 high-powered bubble jets for a refreshing massage, a heating system for personalized temperature control, and a built-in hard water treatment system for gentler water on the skin.

Safety Information

Always read and follow all instructions and warnings carefully before installing and using this product. Failure to do so can result in serious injury, property damage, or death. This manual contains important information regarding the setup, operation, and maintenance of your Intex PureSpa. Keep this manual for future reference.

- Ensure the spa is placed on a flat, level, and stable surface capable of supporting the weight of the filled spa and occupants.
- Do not use extension cords. Connect the spa directly to a grounded electrical outlet.
- Always supervise children in and around the spa.
- Consult a physician before use if you have health conditions.
- Due to state restrictions, this item cannot be shipped to California.

Setup

Proper setup is crucial for the performance and longevity of your PureSpa. Follow these general steps:

1. **Site Selection:** Choose a suitable location that is flat, level, and free of sharp objects. Ensure adequate drainage and access to a grounded electrical outlet.
2. **Unpack Components:** Carefully remove all items from the packaging, including the spa liner, control unit, insulated cover, thermal ground cloth, and accessories.
3. **Place Ground Cloth:** Lay the thermal ground cloth in your chosen location.
4. **Inflate Spa:** Connect the inflation hose to the control unit and the spa's air valve. Inflate the spa until it is firm to the touch, but not over-inflated.
5. **Connect Control Unit:** Attach the control unit to the spa liner following the instructions in the detailed manual. Ensure all connections are secure.
6. **Fill with Water:** Fill the spa with fresh water to the recommended level, typically between the MIN and MAX fill lines.

Operating Instructions

The Intex PureSpa features an easy-to-use control panel to manage all functions:

- **Power Button:** Turns the spa system on or off.
- **Bubble Jet Button:** Activates the 120 high-powered bubble jets for a soothing massage. Press again to turn off.
- **Heater Button:** Turns the heating system on or off. The heater will automatically turn off once the desired temperature is reached.
- **Temperature Adjustment:** Use the up and down arrows to set your preferred water temperature. The heating system will work to maintain this setting.
- **Hard Water Treatment System:** The built-in hard water treatment system automatically works to make the water gentler on your skin. Refer to the full manual for details on its operation and maintenance.

Maintenance

Regular maintenance ensures optimal performance and extends the life of your PureSpa:

- **Filter Cartridge:** Check and clean the filter cartridge daily or after each use. Replace cartridges every few weeks, depending on usage and water quality.
- **Water Chemistry:** Regularly test and adjust water chemistry (pH, chlorine/bromine levels) to ensure safe and clean water.
- **Hard Water Treatment:** The built-in hard water treatment system helps reduce mineral buildup. Follow the manual's instructions for any specific maintenance related to this system.
- **Spa Cleaning:** Periodically clean the interior and exterior of the spa with a mild cleaner and soft cloth.
- **Cover Use:** Always use the insulated cover and lock when the spa is not in use to minimize heat loss and keep debris out.
- **Storage:** When not in use for extended periods, drain, clean, and thoroughly dry the spa. Store it in the included carry bag in a dry, protected area.

Troubleshooting

If you encounter issues with your Intex PureSpa, consider the following common troubleshooting steps:

- **No Power:** Ensure the power cord is securely plugged into a grounded outlet and the GFCI is not tripped.
- **No Heat:** Check if the heater button is activated and the desired temperature is set higher than the current water temperature. Ensure the filter cartridge is clean.
- **Weak Bubbles:** Verify that the bubble jet button is pressed and the air blower intake is not obstructed.
- **Error Codes:** If an error code appears on the control panel, refer to the comprehensive user manual for specific code meanings and solutions.

If problems persist after attempting these steps, please contact Intex customer support for assistance.

Specifications
