PKPOWER AC Power Cord Cable for QFX SBX-410602

PK Power AC Power Cord Cable for QFX SBX-410602 Speaker User Manual

Model: AC Power Cord Cable for QFX SBX-410602

1. Introduction

This manual provides instructions for the safe and proper use of your PK Power AC Power Cord Cable, designed for the QFX SBX-410602 Speaker with Built-in Amplifier Bluetooth. Please read this manual thoroughly before use and retain it for future reference.

2. Important Safety Information

To ensure safe operation and prevent damage, observe the following precautions:

- **Voltage Compatibility:** Ensure the power outlet voltage matches the cable's input specifications (100-240V 50-60Hz).
- **Proper Connection:** Always insert the plug fully into the outlet and the device. A loose connection can cause overheating.
- **Avoid Damage:** Do not bend, twist, or pull the cable excessively. Avoid placing heavy objects on the cable.
- **Environmental Conditions:** Do not expose the cable to water, excessive moisture, or extreme temperatures. Use indoors only.
- **Disconnection:** Always grasp the plug, not the cable, when disconnecting from the power source or device.
- **Protection Features:** This cable includes Over Voltage Protection (OVP), Over Current Protection (OCP), and Short Circuit Protection (SCP) to safeguard your device.
- **Certification:** PK-Power products are CE / FCC / RoHS certified, ensuring they meet safety and quality standards.

3. Setup Instructions

Follow these steps to connect your PK Power AC Power Cord Cable to the QFX SBX-410602 Speaker:

1. **Inspect the Cable:** Before connecting, visually inspect the power cord for any signs of damage, such as cuts, frayed wires, or bent prongs. Do not use if damaged.

2. **Locate Power Port:** Identify the AC power input port on your QFX SBX-410602 Speaker. This port is typically located on the rear panel of the speaker.
3. **Connect to Speaker:** Insert the female end of the PK Power AC Power Cord Cable firmly into the AC power input port of the QFX SBX-410602 Speaker. Ensure a snug fit.
4. **Connect to Power Outlet:** Insert the male end of the power cord into a standard wall power outlet. Ensure the outlet provides the correct voltage (100-240V).
5. **Verify Connection:** Once both ends are connected, ensure the cable is not strained or kinked. The speaker should now be ready to receive power.

Image 1: The PK Power AC Power Cord Cable uncoiled, displaying its male plug and female connector ends. This illustrates the cable's design for connecting to a power source and a device.

4. Operating Instructions

The PK Power AC Power Cord Cable is a passive component designed to supply electrical power. Once properly connected, it facilitates the power flow to your QFX SBX-410602 Speaker. There are no operational controls on the cable itself.

- Ensure the cable is securely connected at both ends before powering on your speaker.
- Refer to your QFX SBX-410602 Speaker's manual for specific power-on procedures and operational details.

5. Care and Maintenance

Proper care extends the life of your power cord and ensures safe operation:

- **Cleaning:** Disconnect the cable from all power sources before cleaning. Wipe with a dry, soft cloth. Do not use liquid cleaners or solvents.
- **Storage:** When not in use, coil the cable loosely. Avoid tight coiling or kinking, which can damage internal wires. Store in a cool, dry place away from direct sunlight.
- **Regular Inspection:** Periodically check the cable for any signs of wear, cuts, or damage, especially near the plugs. Replace immediately if damage is found.

Image 2: The PK Power AC Power Cord Cable neatly coiled, demonstrating proper storage to prevent damage and tangling.

6. Troubleshooting

If your QFX SBX-410602 Speaker is not receiving power, consider the following:

Problem	Possible Cause	Solution
Speaker not powering on.	Cable not fully connected.	Ensure both ends of the power cord are securely plugged into the speaker and the wall outlet.
Speaker not powering on.	Wall outlet is not active.	Test the wall outlet with another device to confirm it is supplying power. Check circuit breakers if necessary.
Speaker not powering on.	Damaged power cord.	Inspect the power cord for visible damage. If damaged, discontinue use and replace the cable.
Intermittent power to speaker.	Loose connection or internal cable damage.	Ensure connections are tight. If the issue persists, the cable may be faulty and require replacement.

If troubleshooting steps do not resolve the issue, contact customer support.

7. Product Specifications

- **Brand:** PKPOWER
- **Input Voltage:** 100-240V AC
- **Frequency:** 50-60Hz
- **Connector Type:** Male-to-Female (Standard AC Power Connector)
- **Number of Outlets:** 1 (for connecting to a single device)
- **Protection Features:** Over Voltage Protection (OVP), Over Current Protection (OCP), Short Circuit Protection

(SCP)

- **Certifications:** CE, FCC, RoHS compliant
- **Compatibility:** Specifically designed for QFX SBX-410602 Speaker with Built-in Amplifier Bluetooth.
- **Manufacturer:** PKPOWER
- **ASIN:** B07BR4DMYV
- **GTIN/UPC:** 716833581011

8. Warranty and Customer Support

PK-Power stands by the quality of its products. For any inquiries or assistance, please contact our customer service team.

- **Customer Service:** Our friendly and reliable customer service will respond to you within 24 hours.
- **Returns/Replacements:** Refer to your purchase platform's return policy for details on refunds or replacements.
