Dupad story H20

Dupad story H20 Mini Wireless Keyboard with Touchpad User Manual

Model: H20

Introduction

This manual provides detailed instructions for the setup, operation, and maintenance of your Dupad story H20 Mini Wireless Keyboard with Touchpad. Please read this manual thoroughly before using the device to ensure optimal performance and longevity.

Product Overview and Features

The Dupad story H20 is a compact, multi-functional wireless keyboard designed for various devices including PCs, laptops, smart TVs, Android TV boxes, and more. It integrates a full QWERTY keyboard with a large touchpad, offering convenience and versatility.

- **Auto-rotate Touch Panel:** The touchpad's coordination index automatically adjusts based on the device's orientation, similar to smartphone screen rotation.
- **Auto Sleep and Wake-up Mode:** The keyboard automatically enters sleep mode after a period of inactivity and wakes up when picked up or a key is pressed.
- **IR Learning Function:** Built-in infrared learning allows you to program the remote to control basic functions of other IR-enabled devices, such as TV box shutdown.
- **Rechargeable Design & Backlit:** Features a QWERTY keyboard with 3-level adjustable backlighting and a touchpad with colorful breathing light for use in low-light conditions. Includes a built-in 300mAh removable Li-ion battery.
- **Stable Signal and Wide Compatibility:** Offers a wireless range of up to 10 meters (32.8ft) with a stable signal. It is plug-and-play, requiring no software installation, and is compatible with PC, Laptop, Projector, Mac OS, Linux, HTPC, IPTV, Google Android Smart TV Box, and Windows 2000/XP/Vista/7/8/10.

Package Contents

Please check the package for the following items:

- H20 Mini Wireless Keyboard with Touchpad
- USB Receiver Dongle
- USB Charging Cable
- User Manual (this document)

Setup Instructions

1. Charging the Keyboard

Before first use, fully charge the keyboard. Connect the provided USB charging cable to the keyboard's charging port and the other end to a USB power source (e.g., computer USB port, USB wall adapter). The charging indicator light will illuminate during charging and turn off when fully charged.

2. Connecting the USB Receiver

1. Locate the USB receiver dongle, usually stored in a compartment within the keyboard itself.
2. Plug the USB receiver into an available USB port on your target device (PC, Smart TV, Android TV Box,

etc.).

3. The device should automatically recognize the keyboard. No additional drivers are typically required.

3. Powering On/Off

Locate the power switch on the side of the keyboard. Slide it to the 'ON' position to power on the device. Slide it to 'OFF' when not in use to conserve battery life.

Operating Instructions

1. Keyboard Functionality

The H20 features a full QWERTY keyboard layout. Simply type as you would on a standard keyboard. Function keys (F1-F12) are accessible, and special characters can be accessed using the 'Fn' key in combination with other keys.

2. Touchpad Functionality

The integrated touchpad supports various gestures:

- **Single-finger Tap:** Functions as a left-click.
- **Two-finger Tap:** Functions as a right-click.
- **Two-finger Drag:** Scrolls vertically or horizontally.
- **Multi-finger Gestures:** The touchpad supports various multi-finger gestures for enhanced navigation. Refer to your operating system's settings for specific gesture configurations.

The touchpad also features an auto-rotation function, where its orientation adjusts automatically based on how you hold the device, ensuring consistent cursor control.

3. Backlight Control

The keyboard features a 3-level adjustable backlight and a colorful breathing light for the touchpad. To adjust the backlight brightness, press the dedicated backlight key (often indicated by a sun icon). To change the touchpad's breathing light color, use the designated multi-finger gesture (typically four fingers touch and hold on the touchpad).

Image: A comparison highlighting the innovative backlight design of the H20, showing smoother light rays and double colors for characters visible in darkness, compared to traditional backlights.

4. IR Learning Function

The H20 includes an IR learning function, allowing it to mimic the power button of another IR remote (e.g., for a TV or TV Box). To use this feature:

1. Ensure the H20 keyboard is powered on.
2. Press and hold the 'IR' button on the H20 until the indicator light starts blinking slowly.
3. Point the original IR remote's emitter towards the H20's IR receiver (usually at the top edge) and press the button you wish to learn (e.g., power button).
4. The H20's indicator light will blink rapidly to confirm successful learning.
5. Press the 'IR' button again on the H20 to exit learning mode.

Once learned, pressing the designated button on the H20 will transmit the learned IR signal.

5. Auto Sleep and Wake-up

To conserve battery, the keyboard will automatically enter sleep mode after a period of inactivity. To wake it up, simply pick up the device or press any key. The backlight will illuminate upon waking.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the keyboard and touchpad. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the device. Avoid harsh chemicals or abrasive cleaners.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, and if storing for an extended period, charge it to about 50% and store in a cool, dry place.
- **Storage:** Store the keyboard in a clean, dry environment away from extreme temperatures and direct sunlight.

Troubleshooting

- **Keyboard not responding:**
  - Ensure the keyboard is powered on and fully charged.
  - Verify the USB receiver is securely plugged into the device's USB port.
  - Try plugging the USB receiver into a different USB port.
  - Restart your computer or host device.
  - If the keyboard entered auto-sleep mode, press any key to wake it up.
- **Touchpad not working correctly:**
  - Ensure your fingers are clean and dry.
  - Avoid resting multiple fingers on the touchpad unless performing a multi-finger gesture.
  - The touchpad's orientation adjusts automatically; ensure you are using it in a natural position.
- **Backlight not working/dim:**
  - Ensure the keyboard is sufficiently charged.
  - Press the backlight key to cycle through brightness levels or turn it on/off.
- **IR learning not successful:**
  - Ensure the original remote's battery is not low.
  - Maintain a close distance (within 1-3 cm) between the remotes during the learning process.
  - Ensure direct line of sight between the IR emitters/receivers.
- **Short battery life:**
  - Ensure the keyboard is fully charged before use.
  - Turn off the keyboard using the power switch when not in active use, rather than relying solely on auto-sleep.
  - Reduce backlight brightness if not needed.

Technical Specifications

Model	H20
Item Model Number	8541649328
Product Dimensions	4.92 x 6.3 x 0.63 inches (12.5 x 16 x 1.6 cm)
Item Weight	3.36 ounces (95.25 grams)
Brand	Dupad story
Manufacturer	Dupad story
Compatible Devices	Laptop, PC, Projector, Smart TV, Smartphone (via OTG), Android TV Box, HTPC, IPTV, Raspberry Pi

Special Features	Backlit, Rechargeable, IR Learning, Auto-rotate Touch Panel, Auto Sleep/Wake
Material	Polycarbonate
