Waterdrop WD-PT-07B

Waterdrop Water Filter Pitcher User Manual

Model: WD-PT-07B
Brand: Waterdrop

Product Overview

The Waterdrop Water Filter Pitcher is designed to provide clean, filtered drinking water for your home. Featuring a 10-cup capacity and a long-life filter, it effectively reduces common contaminants and improves water taste.

This image shows the Waterdrop Water Filter Pitcher in blue, highlighting its transparent body, blue filter reservoir, and ergonomic handle.

What's in the Box

- Water Filter Pitcher System *1
- Pitcher Filter Replacement *1
- User's Manual *1

Setup Guide

1. Prepare the Filter

Before first use, soak the new filter in cold water for 10 minutes to remove any loose carbon and activate the filter media.

This image shows the white filter submerged in a bowl of water, illustrating the soaking process.

2. Install the Filter

Insert the prepared filter firmly into the designated slot within the pitcher's reservoir. Ensure it is securely seated to prevent unfiltered water from bypassing the filter.

This image shows a hand inserting the white filter into the blue reservoir of the pitcher.

3. Initial Rinse

For the first two full pitchers of filtered water, discard the water or use it for watering plants. This helps to flush out any remaining loose carbon particles and prepare the filter for optimal performance.

Operating Your Pitcher

Filling the Pitcher

The Waterdrop pitcher features an automatic water inlet. Simply place the pitcher under your faucet and let the water flow directly into the top opening. The lid will automatically open to allow water in and close when full, preventing dust accumulation.

This image demonstrates how to fill the pitcher by pouring water directly into the automatic inlet on the lid.

Pouring Filtered Water

Once the water has filtered through to the main reservoir, you can pour clean, purified water directly from the spout.

This image shows the Waterdrop Water Filter Pitcher being tilted to pour filtered water from its spout into a glass.

Care and Maintenance

Filter Replacement

The filter has a lifespan of up to 200 gallons or approximately 3 months, whichever comes first. Replace the filter regularly to ensure continued high-quality filtration.
The pitcher is equipped with a smart LED indicator on the lid to remind you when to replace the filter.

This image displays the LED indicator on the pitcher's lid, showing different light colors (blue, flashing red, solid red) to indicate filter status.

Cleaning the Pitcher

Wash the pitcher and reservoir regularly with mild detergent and warm water. Do not wash the filter with soap. The pitcher components are easy to disassemble for thorough cleaning.

Residual Chlorine Filtration Effect of Waterdrop Pitchers

This video demonstrates the effectiveness of the Waterdrop filter in reducing residual chlorine in water, showcasing a before-and-after comparison using a chlorine reagent test.

Troubleshooting

Slow Filtration

If filtration seems slow, ensure the filter is properly seated. Sometimes, air bubbles can get trapped; try gently shaking the pitcher to dislodge them. If the filter is old, it may be time for a replacement.

Water Taste/Odor

If the filtered water has an unusual taste or odor, ensure the filter was properly pre-soaked and installed. It may also indicate that the filter needs to be replaced.

Product Specifications

Attribute	Value

Brand	Waterdrop
Model Name	WD-PT-07B
Product Dimensions	10"L x 5"W x 10.1"H
Item Weight	2.73 Pounds
Filter Lifespan	Up to 200 gallons or 3 months
Certifications	NSF 42 & 372 Certified
Power Source	Non Electric
Installation Type	Countertop
Special Feature	Reduces PFOA/PFOS, Chlorine, Odor, Iron, Mercury, Copper

This image illustrates the compact dimensions of the Waterdrop pitcher (10"L x 5"W x 10.1"H), designed to fit most refrigerator doors.
