MINISO 3D Nail Stickers (03 GLORIOUS PARADE) Instruction Manual

Model: WBD002M2WM-IND

Product Overview

The MINISO 3D Nail Stickers (03 GLORIOUS PARADE) are designed to provide a fashionable and elegant nail art solution. These stickers feature an elastic texture, a shiny finish, and a 3D effect when applied. Made with environmentally friendly resin glue, they aim to prevent fingernail injuries often associated with traditional nail applications. Each pack contains 32 pieces, offering a variety of designs to fit most nail sizes, and can be trimmed for a custom fit.

Safety Information and Cautions

Please read and understand the following safety guidelines before using the product:

- **Not suitable for children under 3 years old.** Keep out of reach of young children to prevent accidental ingestion or misuse.
- Avoid exposing the product to **high temperatures and direct sunlight**. Store in a cool, dry place.
- Keep away from **fire** and open flames.
- This product is for external use on nails only. Do not apply to skin or ingest.
- Discontinue use if any irritation, redness, or discomfort occurs. Consult a medical professional if symptoms persist.

Setup and Preparation

Before applying the nail stickers, ensure your nails are properly prepared for optimal adhesion and longevity.

1. **Clean your nails:** Use alcohol or a nail polish remover to thoroughly clean the surface of your nails. This removes any oils, dirt, or residue that could prevent the stickers from adhering properly. Ensure nails are completely dry before proceeding.
2. **Select the right size:** Carefully take off the transparent protective layer from the sticker sheet. Select the nail sticker that best fits the size and shape of each of your nails. If necessary, you can trim the sticker slightly before application.

Operating Instructions (Application)

Follow these steps for proper application of the MINISO 3D Nail Stickers:

1. **Align and Apply:** Align the selected sticker to your nail. Carefully place it onto the nail, starting from the cuticle area.

2. **Smooth Out:** Once positioned, gently push the sticker with your fingers from the middle of the nail outward towards the edges. This helps to remove any air bubbles and ensures a smooth, secure adhesion.
3. **File Excess:** With the supplied nail file (or your own), maintain a 45-degree angle and gently file off any excess parts of the sticker that extend beyond the tip or sides of your nail. File downwards in one direction to avoid tearing the sticker.

Removal Instructions

To remove the nail stickers without damaging your natural nails:

1. **Gentle Pull:** Gently pull the sticker from one side of the nail towards the other. Avoid harsh pulling to prevent damage to your nail surface.
2. **Clean Residue:** If any adhesive residue remains, gently wipe your nails with a cotton pad soaked in nail polish remover or rubbing alcohol.

Maintenance and Storage

- **Storage:** Store unused nail stickers in their original packaging in a cool, dry place, away from direct sunlight and high temperatures.
- **Reusability:** While the product description mentions "Reusable", the adhesive nature of nail stickers typically limits effective reapplication. For best results, use fresh stickers for each application.
- **Handling:** Handle stickers with clean, dry hands to maintain adhesive quality.

Troubleshooting

Common issues and their solutions:

- **Stickers not adhering well:**
  - Ensure nails are thoroughly cleaned and dry before application. Oils or moisture can prevent adhesion.
  - Press firmly from the center outwards to remove air bubbles and ensure full contact.
- **Stickers tearing during application/filing:**
  - Use a sharp nail file and file in one consistent downward direction.
  - Ensure the sticker is fully adhered before filing.
- **Stickers peeling prematurely:**
  - Ensure proper nail preparation (clean and dry).
  - Avoid excessive contact with water or harsh chemicals immediately after application.
  - Consider applying a clear top coat for extended wear, though this is not explicitly required by the product.
