Positive pole upwards to install the battery.
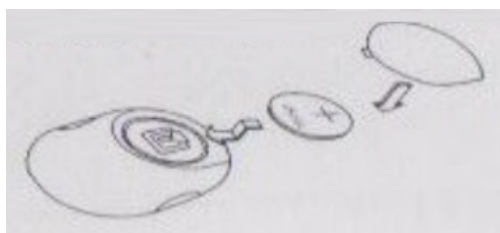

Warnings: Ingestion Hazard

- This product contains a button cell or coin battery.
- Death or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause internal chemical burns in as little as 2 hours.
- Keep new and used batteries out of reach of children.
- Seek immediate medical attention if a battery is suspected to be swallowed or inserted inside any part of the body.

About the Button Cell Battery Tip

1. The statement "Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate them."
2. The statement "Even used batteries may cause severe injury or death."
3. The statement "Call a local poison control center for treatment information."
4. A statement indicating the compatible battery type (e.g., LR44, CR2032).
5. A statement indicating the nominal battery voltage.
6. The statement "Non-rechargeable batteries are not to be recharged."
7. The statement "Do not force discharge, recharge, disassemble, heat above (manufacturer's specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns."

Additional Battery Safety Tips

1. The statement "Ensure the batteries are installed correctly according to polarity (+ and -)."
2. The statement "Do not mix old and new batteries, different brands or types of batteries, such as alkaline, carbon-zinc, or rechargeable batteries."
3. The statement "Remove and immediately recycle or dispose of batteries from equipment not used for an extended period of time according to local regulations."
4. The statement "Always completely secure the battery compartment. If the battery compartment does not close securely, stop using the product, remove the batteries, and keep them away from children."

FAQ
