Metering panel

Warning! Hazardous voltage! Installation by a person with electrotechnical expertise only.

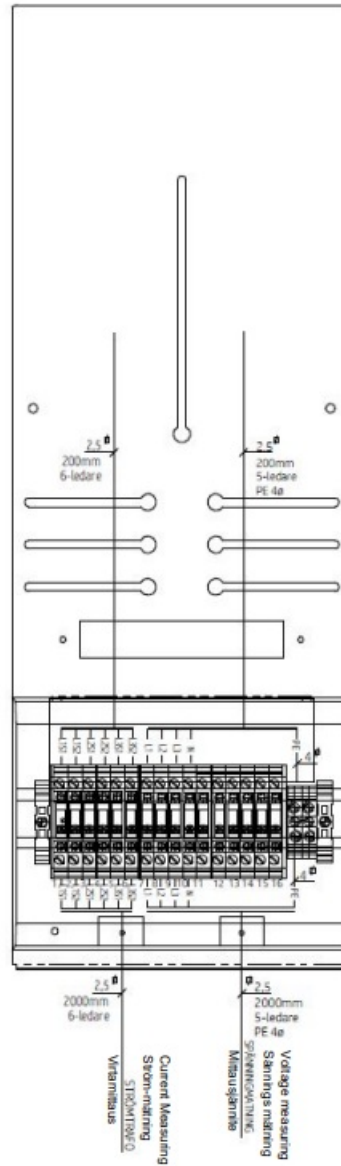

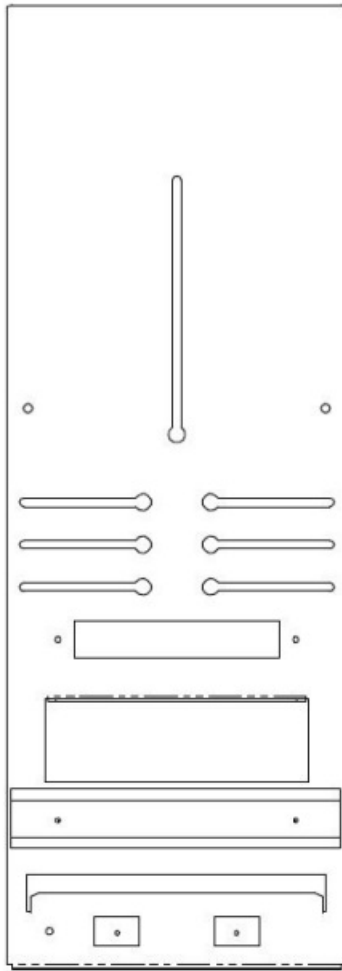

MOUNTING INSTRUCTION

When mounting on an aluminum attachment profile or the wooden mounting plate use the screws which come fixed to the metering plate.

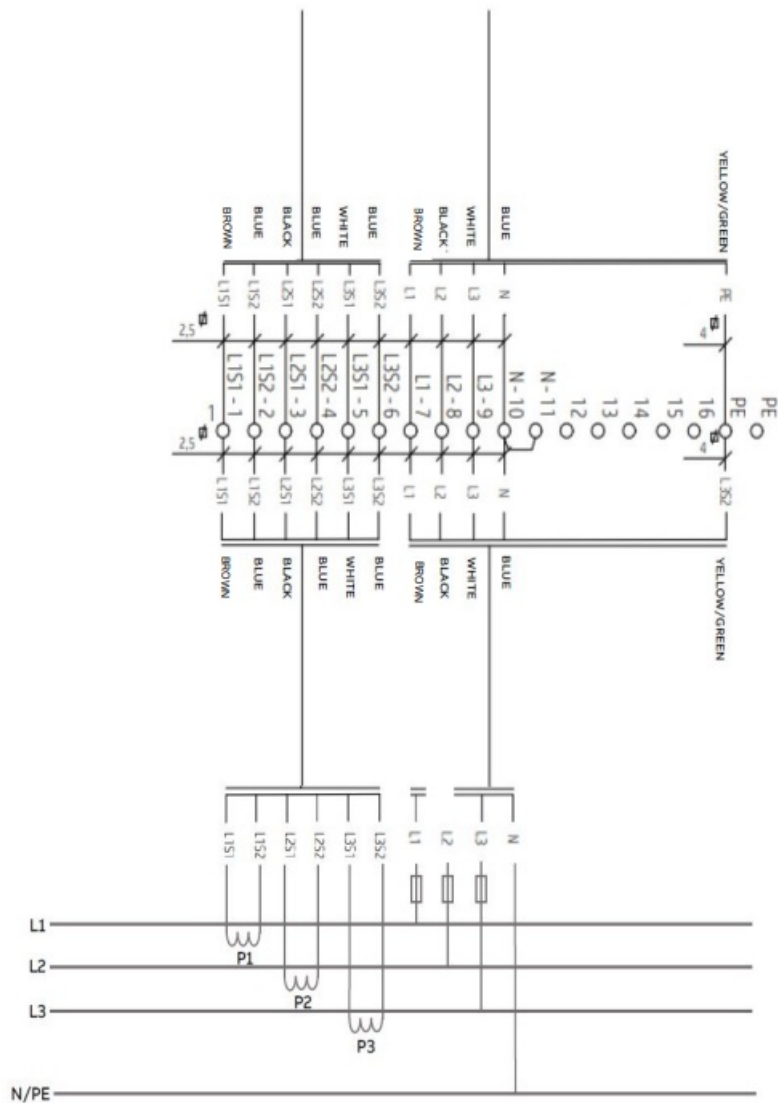

When mounting on a metal mounting plate use the self-drilling screws which come in the package. Customer/electrician do have to add the earthing of current circuit if needed. A PE connection bar is reserved for this.

Always check connections before voltage energizations.
