Mystim MS46610

Mystim Barry Bite E-Stim Nipple Clamps User Manual

Model: MS46610

Introduction

The Mystim Barry Bite E-Stim Nipple Clamps are bi-polar electro-conductive body clamps designed to provide targeted electrical stimulation. Each clamp is bi-polar, ensuring that only the tissue between the two halves of the clamp is stimulated. This design allows for simultaneous stimulation of both nipples without leading electricity through the heart. The clamps feature a small screw for adjusting the intensity of the stimulation, allowing for either a firm "bite" or a gentle "nibble." Gold contacts are incorporated for intense and continuous stimulation. These clamps require an external e-stim device, such as the Mystim Tension Lover or Mystim Pure Vibes, to function.

Important Safety Information

Please read and understand all safety instructions before using the Mystim Barry Bite E-Stim Nipple Clamps. Improper use can lead to injury.

- **Consult a Physician:** If you have any pre-existing medical conditions, especially heart conditions, pacemakers, epilepsy, or are pregnant, consult a physician before use.
- **External E-Stim Device Required:** These clamps are passive and require a compatible e-stim device (e.g., Mystim Tension Lover, Mystim Pure Vibes) to operate. Do not attempt to connect them directly to a power source.
- **Placement:** Always ensure the clamps are placed only on the intended body regions (e.g., nipples, lips). The bi-polar design stimulates only the tissue between the clamp halves.
- **Intensity Adjustment:** Start with the lowest intensity setting on your e-stim device and gradually increase it to a comfortable level. Do not exceed comfortable limits.
- **Discontinue Use:** If you experience any discomfort, pain, skin irritation, or unusual sensations, immediately discontinue use and consult a medical professional.
- **Not for Medical Use:** This product is not a medical device and is not intended to diagnose, treat, cure, or prevent any disease or health condition.
- **Keep Out of Reach of Children:** Store the product safely away from children.
- **Water Resistance:** The product is listed as waterproof. However, ensure proper connection and handling when used in wet environments. Do not submerge the e-stim device.

Legal Disclaimer: Statements regarding dietary supplements have not been evaluated by the FDA and are not intended

to diagnose, treat, cure, or prevent any disease or health condition.

Package Contents

- Mystim Barry Bite E-Stim Nipple Clamps (Pair)
- Connection Cables (requires 2 mm plug female)

Setup

1. **Unpack:** Carefully remove the Barry Bite clamps and cables from their packaging.
2. **Inspect:** Before each use, visually inspect the clamps and cables for any signs of damage, wear, or exposed wires. Do not use if damaged.
3. **Connect Cables:** Attach the provided connection cables to the Barry Bite clamps. Ensure a secure connection. The cables require a 2 mm female plug for connection to your e-stim device.
4. **Connect to E-Stim Device:** Connect the other end of the cables to your compatible Mystim e-stim device (e.g., Tension Lover, Pure Vibes). Ensure the e-stim device is turned off or set to the lowest intensity before connecting.

Image: Two Mystim Barry Bite E-Stim Nipple Clamps. Each clamp is black with a spring mechanism and gold-colored contacts at the tip. A small screw is visible on the top of each clamp for adjustment. Black cables extend from the rear of each clamp.

Operating Instructions

1. **Prepare Area:** Ensure the skin area where the clamps will be applied is clean and dry.
2. **Adjust Clamp Tension:** Use the small screw on each clamp to adjust the tension. Turning the screw clockwise increases the "bite" (tighter grip), while turning it counter-clockwise loosens it for a gentler "nibble." Adjust to a comfortable, secure fit before applying.
3. **Apply Clamps:** Carefully apply the clamps to the desired body region, such as the nipples. Ensure the tissue is properly positioned between the two halves of the clamp for effective bi-polar stimulation.
4. **Activate E-Stim Device:** With the clamps securely in place and the e-stim device connected, turn on your e-stim device.
5. **Adjust Intensity:** Slowly increase the intensity on your e-stim device. Begin with the lowest setting and gradually raise it until you achieve the desired level of stimulation. Do not increase the intensity beyond a comfortable sensation.
6. **Monitor Sensation:** Pay close attention to your body's response. If any discomfort or pain occurs, immediately reduce the intensity or turn off the e-stim device.
7. **Discontinue Use:** When finished, turn off your e-stim device before carefully removing the clamps from your body.

Maintenance

- **Cleaning:** After each use, disconnect the clamps from the e-stim device and clean them thoroughly. Use a mild soap and water solution or a specialized cleaner for electro-stimulation accessories. Ensure all parts are completely dry before storage.
- **Storage:** Store the Barry Bite clamps and cables in a clean, dry place, away from direct sunlight and extreme temperatures. Keep them separate from other items that could cause damage.
- **Inspection:** Regularly inspect the clamps, cables, and gold contacts for any signs of wear, corrosion, or damage. Replace if any damage is observed.

Troubleshooting

Problem	Possible Cause	Solution
No stimulation or weak stimulation.	E-stim device not turned on or low battery. Cables not securely connected. Clamps not properly applied to skin. Intensity setting too low on e-stim device. Damaged cables or clamps.	Ensure e-stim device is on and charged. Check all cable connections. Re-position clamps to ensure good contact. Gradually increase intensity on e-stim device. Inspect for damage; replace if necessary.
Discomfort or pain during use.	Intensity setting too high. Clamps applied too tightly. Skin irritation. Improper placement.	Reduce intensity immediately. Adjust clamp tension using the screw. Discontinue use if irritation persists. Ensure clamps are placed correctly on the intended area.

Specifications

- **Model:** MS46610
- **Type:** Bi-polar Electro-conductive Nipple Clamps
- **Contacts:** Gold
- **Cable Connection:** Requires 2 mm plug female
- **Product Dimensions:** Approximately 3.94 x 3.94 x 1.57 inches (L x W x H)
- **Weight:** Approximately 1.83 ounces
- **Water Resistance Level:** Waterproof
- **Manufacturer:** MYSTIM
- **First Available:** March 26, 2019

Warranty and Support

The Mystim Barry Bite E-Stim Nipple Clamps come with a**24-month warranty** from the date of purchase. This warranty covers manufacturing defects and material faults under normal use conditions.
For warranty claims, technical support, or any inquiries regarding your product, please contact Mystim customer service through their official website or the retailer from whom you purchased the product. Please have your proof of purchase

and model number (MS46610) ready when contacting support.

Note: The warranty does not cover damage caused by misuse, accident, unauthorized modification, or normal wear and tear.
