- **Connectivity Technology:** Wired
- **Special Feature:** Motion Sensor
- **Product Dimensions:** 1.97 x 1.97 x 1.97 inches
- **Item Weight:** 6.6 ounces

Parts Overview

- 1. Lens
- 2. Microphone
- 3. Wall hook
- 4. USB power port
- 5. Status light
- 6. Reset button
- 7. Speaker
- 8. Adjustable mount

- 9. USB power cable
- 10. AC wall adapter
- 11. Mount screw & wall anchor

Adding the camera as a stand-alone device

You can use the abode Cam 2 as standalone device which does not require an abode gateway or iota. A smartphone with the abode app installed is required to perform setup. Search for the app in Google Play or Apple App Store to download the application.

1. Open the Abode app and create a new account
2. Power up the camera using the included USB Cable and AC wall adapter or a 5V USB port. Wait up to 30 seconds for the device to warm up.
3. Navigate to your devices list and select "Add Device"
4. Choose abode Cam 2. Follow in-app prompts to add the camera to your account.
5. After successfully adding your abode Cam 2 to your account the camera may be powered down and re-installed in desired location and re-powered. Video stream and recorded clips from the camera will be accessible on the Abode app Dashboard.

Adding the camera to an existing Abode system

1. Open the Abode app and login to your account
2. Power up the camera using the included USB Cable and AC wall adapter or a 5V USB port. Wait up to 30 seconds for the device to warm up.
3. Navigate to your devices list and select "Add Device"
4. Choose abode Cam 2. Follow in-app prompts to add the camera to your account.
5. After successfully adding your abode Cam 2 to your account the camera may be powered down and re-installed in desired location and re-powered. Video stream and recorded clips from the camera will be accessible on the Abode app Dashboard.

Mounting the camera

Once the camera has been setup via the abode app the camera can be installed in your desired location. The abode Cam 2 can be placed on a shelf (flat bottom) inside, or mounted indoors or outdoors with the built-in

adjustable mount.

Plan Cable Path

Before installing, plan an ideal cable path. It's recommended to mount the camera out of direct sunlight and under a shelter for the best image quality. Leave enough length to install and adjust the camera angle.

Install Mount Screw (if using the built-in mount)

If mounting the camera on a wall or ceiling you may use the included mount screw. Use a 1/16″ (2mm) drill bit to drill a pilot hole for the screw. Install the screw into the pilot hole using a Philips screw driver, leaving just enough of the screw head exposed to firmly slide the camera mount over.

If mounting camera to drywall or masonry, use the included wall anchor and a 7/32″ (5.5mm) drill bit to drill a pilot hole. Gently hammer the wall anger into the pilot hole. Install the screw into the wall anchor hole using a Philips screw driver, leaving just enough of the screw head exposed to firmly slide the camera mount over.

Mount Camera

Using the locating wall hook on the back of the camera mount, slide the camera over the exposed screw head. If the camera is loose, or if the camera does not slide over the screw, use a screwdriver to adjust the screw in or out as needed. The USB cable can be routed though the opening on the camera mount, and down the notch on the back of mount.

FAQs

What are the recommended uses for the Abode 104061/A camera?

The Abode 104061/A camera is specifically designed for Night Vision and Motion Detection.

Who is the manufacturer of this camera?
