ABOOLON P6 4K Projector with Wifi and Bluetooth

Specifications

- **Model Name:** P6
- **Hardware Interface:** VGA, AV Port, USB, HDMI, 3.5mm Audio
- **Mounting Type:** Ceiling /Tripod/Wall /Table Mount/Floor Mount
- **Brand:** ABOOLON
- **Wattage:** 120 watts
- **Item Weight:** 5.7 pounds
- **Product Dimensions:** 10.6 x 9 x 4.7 inches

What's in the box?

- Projector
- Remote Control
- Package Case

Product Descriptions

Aboolon projector additional features:

No additional HDMI converter is required to connect a WiFi projector to a smartphone. It allows for wired and wireless connections. All that is required is a successful WiFi and USB cable connection. Quickly cast the screen to give you the best possible visual experience. To make mobile phone synchronisation simpler, pick our projector.

- You can connect your preferred Bluetooth speaker wirelessly at any time and anywhere if it has Bluetooth functionality and supports Dolby Digital.
- The useful 50%zoom capability and revolutionary 4P/4D + 50 Keystone Correction. It allows for flexible positioning in any setting and is compatible with small conference-friendly Office software.
- Vast screen (Max 500"display).
- Enjoy it in 24 hours with a 4k urethra HD projector with great brightness and dual 10w.

4K and 98% of the RGB colour signal support

Without downscaling or compression, 4K provides clear and detailed visuals from high definition content. 98% of the RGB colour signal is displayed on modern 3LCD screens for every frame. This eliminates any distracting “rain-bowing” or “colour brightness” difficulties present with other projection systems while retaining good colour brightness.

The best brightness on the market is a 4K projector with wifi and bluetooth. It can still show a clean, vibrant, and fully restored picture after 24 hours at an astounding 800 ANSI of brightness. The LED projector is visible at the screen’s margins in the meanwhile. Any angle makes comfortable and balanced sound astonishing. However, the other projector is just 1080 P. Dual 5W speakers built-in.

The native resolution of the projector is determined by the total number of pixels in the device. For outdoor movies, the more pixels you can accommodate in the monitor, the clearer and more detailed your visuals will appear. For outdoor, gaming, and commercial projectors, higher resolution is particularly crucial.

When compared to 1920*1080 Native Abolun HD 1080P, it has a resolution that is four times higher. Tens of thousands of reflective lenses make up the Abolun Projector’s chip, and each lens is instantly replaced every second to provide full HD images. The colour of the image will be better the higher the contrast ratio. The Abolun smart projector will bring you close to nature’s colour with a 15000:1 contrast ratio.

Features

Support for native 1080P&UHD, 4K, and 800ANSI The market’s brightest (800ANSI) and clearest 1080P (1920*1080) projectors with wifi and Bluetooth are made by Abolun. Protect your eyes while enjoying HD video with a wider colour range, crisper visuals, and more detail. The newest full-screen technology is used to ensure that the screen’s corners are equally clear as its centre. With 4K super HD, you can experience high-quality home cinema.

- The most recent 5G WiFi connectivity technology uses the same router for screen mirroring in addition to your phone network for connection. It also supports DNS and Dolby Digital.
- It provides a significantly more lag-free and fluid internet video streaming experience.
- IOS, Android, and laptop devices can be simply configured to make them easier to use (No Need Cables or Adapters).
- Be sure you choose Dolby Digital and Video.
- With 5.1 Bidirectional Bluetooth, 10W HiFi Stereo speakers, and an advanced cooling system, you may enjoy any type of movie, music, or game with your family and friends.

You may utilise the technology to connect your Bluetooth speakers, Bluetooth headphones, and AirPods to the Bluetooth projector because it features a wireless Bluetooth connection feature (No more cables). The built-in dual stereo speakers of the movie projector with SRS produce crisp, well-balanced sound for an absolutely amazing audio experience. Three built-in fans and a sophisticated heat dissipation system significantly increase the lifespan of the movie projector and guarantee image and brightness stability.

- 500" Big Screen, Keystone Correction in 4D/4P, and 50% Image Zoom
- At-home viewing experiences with a large viewing area of 60–500 inches are possible with this portable projector’s ground-breaking 4D/4P Keystone correction.
- You may view from practically any angle because it supports side projection and can modify the vertical and horizontal angles by 50°.
- You can change the image size using the ZOOM function from 50% to 100% without moving the projector.

Does Netflix/YouTube function without a stick?

Netflix, Disney+, Hulu, and Prime Video CANNOT be mirrored or screen cast from the projector due to HDCP copy right restrictions. To connect the projector to a video provider like YouTube, you can use a TV Stick, Wireless Dongle, or Chrome Cast.

Frequently Asked Questions

Although it claims to be compatible with ceiling mount, there are no screw holes. Anyone have a suggestion

The four rubber cushions that the projector rests on when placed on a table must be removed.
The adhesive holding these pads in place is repositionable.
The screw holes needed to secure the ceiling mount can be found [here](#).

What kind of mount specifically do I need to put this to my ceiling?

Any projector bracket with a universal ceiling mount should work.

Which voltage is it?

Response: Aboolon projector specifications voltage of the item: 100-240V 120W Product Power 10W Speaker Power

Does this operate with 220 volt in India?

Yes, it functions well.

Describe the fan noise. Does the noise obstruct the sound in movies or news?

The ABOOLON Projector uses the most modern cooling system, an enhanced fan design, and the use of cutting-edge materials to minimise noise.

Its method of charging

Hello, we suggest using the included DC adaptor to charge the projector. If you carry it, you may also recharge it using a power bank. Please note that the power bank and USB charging cable must both support output of 5V/2.5A or above.

How can I connect my iPhone 12 to wifi?

Hello, feel free to view this video. To connect to wifi, there are two ways. It is really practical and easy.

Can I hear music or use my speakers without being connected to WiFi? When we go camping, I hardly ever have wifi. Why am I unable to just plug in some? Is there an audio out on it?

Yes, use an audio cord to connect.

Can I simultaneously show content from two sources on a single screen?

The projector can only display one source at a time on a screen.

Does this need to be plugged into an outlet or can it be recharged using a portable power bank? – Can I see my iPhone in it?

Please insert a plug into it. It can also be charged using a power bank and a USB cable. (The wire and power bank are made to withstand output of at least 5V/2A. We suggest using a power bank with a 5V/2.5A maximum output. You should mirror your iPhone, of course.

What steps are involved in connecting a Bluetooth speaker?

When utilising an audio wire, there is no Bluetooth option.

Does this link to a Fire Stick?

Indeed, it does!

If the wifi isn't on, will it still work?

Yes, for both my USB drive and iPhone.

If there is no wifi, can an iPad or iPhone still use this with cables?

Yes, use a lightning to USB cable to connect.

Does this have the capacity to rear-project?

Hello, it has a back projection capability.
