Frigidaire EFIC108

Frigidaire Portable Countertop Ice Maker EFIC108-WHITE User Manual

Model: EFIC108-WHITE

Introduction

Thank you for choosing the Frigidaire Portable Countertop Ice Maker, model EFIC108-WHITE. This appliance is designed to provide a convenient and efficient way to produce ice for your home or office. Please read this manual thoroughly before operating your new ice maker to ensure safe use, optimal performance, and proper maintenance. Keep this manual for future reference.

Important Safety Instructions

To reduce the risk of fire, electric shock, or injury when using your ice maker, follow these basic precautions:

- Read all instructions before use.
- Do not touch the evaporator or ice basket when the unit is operating.
- Do not immerse the appliance, power cord, or plug in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug the ice maker from the outlet when not in use, before cleaning, and before servicing.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Contact customer service for assistance.
- Do not use outdoors. This appliance is for indoor household use only.
- Do not place on or near a hot gas or electric burner, or in a heated oven.

- Do not use the appliance for other than its intended use.
- Ensure the voltage of the ice maker corresponds to your household voltage.
- Do not block any ventilation openings.

Product Overview

Familiarize yourself with the components of your Frigidaire Portable Countertop Ice Maker.

Image 2: Key features of the ice maker. This image highlights the stylish viewing window on the lid, the drain plug for easy cleaning, the large 1.5 lbs ice basket, and the included ice scoop. A hand is shown using the scoop to retrieve ice from the basket.

Control Panel

Image 3: The intuitive digital LED control panel. This close-up shows the 'ADD WATER' indicator, 'ICE FULL' indicator, 'POWER' button, and 'S/L' button for selecting small or large bullet ice cubes.

- **ADD WATER Indicator:** Illuminates when the water reservoir needs refilling.
- **ICE FULL Indicator:** Illuminates when the ice basket is full.
- **POWER Button:** Turns the ice maker on or off.
- **S/L Button:** Selects between small (S) and large (L) bullet-shaped ice cubes.
- **Transparent Viewing Window:** Allows you to monitor ice production without opening the lid.
- **Ice Basket:** Removable basket for collecting produced ice.
- **Ice Scoop:** Included for convenient ice retrieval.
- **Drain Plug:** Located at the bottom for easy water drainage during cleaning.

Setup

Unpacking and Placement

1. Remove all packaging materials from the ice maker.
2. Place the ice maker on a flat, stable surface away from direct sunlight and other heat sources (e.g., stove, furnace, radiator). Ensure there is at least 4 inches (10 cm) of space around the unit for proper ventilation.
3. Allow the unit to rest for at least 1 hour before plugging it in, especially if it was transported horizontally. This allows the refrigerant to settle.

Initial Cleaning

Before first use, clean the ice maker thoroughly:

1. Open the lid and remove the ice basket.
2. Clean the interior with a soft cloth dampened with warm water and a mild detergent. Rinse thoroughly.
3. Drain any remaining water through the drain plug at the bottom of the unit.
4. Wipe the exterior with a soft, damp cloth.

Operating Instructions

Adding Water

1. Open the lid and remove the ice basket.
2. Fill the water reservoir with potable water up to the MAX fill line. Do not overfill.
3. Replace the ice basket and close the lid.

Starting Ice Production

1. Plug the ice maker into a grounded electrical outlet.
2. Press the **POWER** button to turn on the unit. The Power indicator light will illuminate.
3. Press the **S/L** button to select your desired ice cube size (Small or Large). The corresponding indicator light will illuminate.

Image 4: A finger pressing the 'S/L' button on the control panel to select the ice cube size. This action initiates the ice production cycle.

Ice Production Cycle

The ice maker will begin its first ice-making cycle. This unit produces 9 bullet-shaped ice cubes approximately every 7-9 minutes, depending on the selected size and ambient temperature.

Image 5: Close-up view of the ice maker's interior, showing freshly produced bullet-shaped ice cubes in the basket. This illustrates the fast ice production capability.

Monitoring and Retrieval

- The **ICE FULL** indicator will light up when the ice basket is full. The ice maker will automatically pause production.
- The **ADD WATER** indicator will light up when the water reservoir is low. The ice maker will pause production until water is refilled.
- Use the provided ice scoop to retrieve ice from the basket. For best results, transfer ice to a freezer for storage as the ice maker is not a freezer and ice will melt over time.

Maintenance

Regular cleaning and maintenance will prolong the life of your ice maker and ensure optimal ice quality.

Daily Cleaning

1. Unplug the ice maker.

2. Remove the ice basket and wash it with warm, soapy water. Rinse and dry thoroughly.
3. Wipe the interior of the unit with a soft cloth.

Image 6: A user demonstrating how to remove the ice basket from the ice maker for cleaning or transferring ice.

Weekly or Bi-Weekly Cleaning

For a more thorough cleaning:

1. Unplug the ice maker.
2. Drain all water from the reservoir by removing the drain plug at the bottom of the unit.
3. Prepare a cleaning solution of water and vinegar (10:1 ratio) or a mild ice maker cleaning solution.
4. Pour the solution into the water reservoir and run a few ice-making cycles (do not consume this ice).
5. Drain the solution completely.
6. Rinse the reservoir thoroughly with clean water and drain again.
7. Wipe all interior and exterior surfaces dry.

Storage

If storing the ice maker for an extended period, ensure it is completely dry and clean. Store it in a cool, dry place.

Troubleshooting

Review the following common issues and solutions before contacting customer service.

Problem	Possible Cause	Solution
Ice maker does not turn on.	No power; unit not plugged in.	Ensure the unit is properly plugged into a grounded outlet. Check the circuit breaker.
"ADD WATER" indicator is lit.	Water reservoir is empty or low.	Refill the water reservoir up to the MAX fill line.
"ICE FULL" indicator is lit.	Ice basket is full.	Remove ice from the basket. The unit will resume ice production automatically.
Ice production is slow or ice cubes are small/misshapen.	Ambient temperature is too high; water temperature is too warm; unit needs cleaning.	Ensure the unit is in a cool environment. Use cold water. Perform a thorough cleaning cycle.
Unit makes unusual noise.	Normal operation sounds (compressor, water pump); unit not level.	Ensure the unit is on a flat, stable surface. Some operational noises are normal. If noise is excessive or new, contact customer support.

Specifications
