- Keep the device clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the device to extreme temperatures, humidity, or direct sunlight.
- Do not attempt to disassemble the device. This will void the warranty and may cause damage.
- Store the device in a cool, dry place when not in use.

8. Troubleshooting

If you encounter issues while using your UCEC VHS to Digital Converter, refer to the common problems and solutions below:

- **No Signal/Black Screen:**
  - Ensure all RCA/S-Video cables are securely connected to both the analog source and the converter.
  - Verify that your analog source (VCR, camcorder) is powered on and playing video.
  - Check that the correct input source is selected in your capture software (e.g., "AV to USB2.0" in QuickTime).
  - Try a different USB port on your computer.
- **Poor Video Quality (Blurry, Skippy, Color Issues):**
  - Ensure the RCA cables are not damaged and are fully inserted. Sometimes, a higher quality RCA cable can improve signal integrity.
  - Check the condition of your original analog tape. Older or damaged tapes can result in poor quality.
  - Verify that your computer meets the minimum system requirements, especially for processing power, to avoid skipping.

- If using S-Video, ensure both video and audio cables are connected, as S-Video only carries video.

- **Software Not Recognizing Device:**
  - Restart your computer and try again.
  - For Windows, ensure the software is correctly installed. You may need to run the installer as an administrator.
  - Check your computer's Device Manager (Windows) or System Information (Mac) to see if the USB device is listed and recognized.
  - Ensure no other applications are using the capture device simultaneously.

- **No Audio:**
  - Ensure the red and white RCA audio cables are correctly connected.
  - Check the audio output settings on your analog source.
  - Verify that the correct audio input is selected in your capture software.
  - Check your computer's sound settings to ensure the input device is enabled and not muted.
