Duracell Optimum AA batteries are designed for immediate use in any device requiring AA alkaline batteries. Once installed, the batteries will power your device according to its specifications.

- For optimal performance, use batteries in devices within their recommended operating temperature range.
- When a device shows signs of low power (e.g., dimming lights, slow operation), it is time to replace the batteries.
- Always replace all batteries in a device at the same time to maintain consistent power delivery and prevent premature drainage.

Maintenance and Storage

Proper maintenance and storage can extend the shelf life and ensure the safety of your Duracell Optimum AA batteries.

- **Storage:** Store unused batteries in their original resealable packaging in a cool, dry place at room temperature. Avoid extreme temperatures.
- **Handling:** Do not carry loose batteries in your pocket or purse with metal objects like coins or keys, as this can cause a short circuit.
- **Disposal:** Dispose of used batteries according to local regulations. Many communities have recycling programs for alkaline batteries. Do not dispose of batteries in fire.
- **Leakage Prevention:** Remove batteries from devices that will not be used for extended periods to prevent potential leakage and damage to the device.

Troubleshooting

If your device is not functioning correctly with new Duracell Optimum AA batteries, consider the following troubleshooting steps:

- **Check Polarity:** Ensure batteries are inserted with the correct positive (+) and negative (-) orientation.
- **Verify Contact:** Make sure the battery terminals are clean and making good contact with the device's contacts. Gently clean contacts with a dry cloth if necessary.
- **Replace All Batteries:** If using multiple batteries, replace all of them simultaneously, even if some appear to be working.
- **Test with Another Device:** If possible, test the batteries in another compatible device to determine if the issue is with the batteries or the original device.
- **Device Malfunction:** If batteries are confirmed to be working in another device, the original device may require service or repair.
