MELOHO CD-12

MELOHO Boxwood Hedge Wall Panels Instruction Manual

Brand: MELOHO | Model: CD-12

Introduction

This manual provides instructions for the installation, use, and maintenance of your MELOHO Boxwood Hedge Wall Panels. These artificial greenery panels are designed for both indoor and outdoor decorative applications, offering a dense and realistic appearance.

Key Features

- **Dense Coverage:** Each panel measures 24 x 16 inches and features 21 grids per row with 308 stitches per panel, ensuring a full and lush appearance. A pack of 12 panels covers approximately 31 square feet.
- **Durable Material:** Constructed from lightweight, super-strong polyethylene, these panels are UV-proof and weather-resistant, designed to resist fading for long-lasting outdoor use.
- **Easy Customization:** Panels can be easily cut to desired shapes or sizes to fit specific design requirements.
- **Simple Interlocking System:** Panels connect securely using an integrated pin and hole lock system, simplifying installation.
- **Versatile Application:** Suitable for various surfaces including drywall, concrete, fences, and wood frames, making them ideal for balconies, walls, patios, and event backdrops.

Package Contents

Upon opening your package, please verify that all components are present and undamaged.

- 12 x MELOHO Boxwood Hedge Wall Panels (24" x 16" each)
- 50 x Zip Ties

Setup and Installation

Follow these steps for proper installation of your boxwood hedge panels.

1. Planning and Preparation

Before installation, measure the area where the panels will be placed to determine the number of panels required. The panels can be trimmed to fit specific dimensions or shapes using standard scissors or utility knives.

2. Connecting Panels

Each panel features an interlocking pin and hole system along its edges. Align the pins of one panel with the corresponding holes of another panel and gently press them together until they click into place. For added security, especially in outdoor or high-traffic areas, use the provided zip ties to reinforce the connections between panels.

3. Mounting the Panels

Once the desired arrangement of panels is assembled, attach them to your chosen surface. For fences, walls, or other structures, use additional zip ties, screws, or nails through the grid backing of the panels. Ensure the panels are securely fastened to prevent movement or detachment.

Usage

MELOHO Boxwood Hedge Wall Panels are designed for decorative purposes, enhancing the aesthetic appeal of various spaces. They can be used to create privacy screens, green backdrops for events, or to add a touch of greenery to indoor and outdoor environments. The panels are suitable for year-round display due to their UV-proof and weather-resistant properties.

Care and Maintenance

These artificial boxwood panels require minimal maintenance to retain their appearance.

- **Cleaning:** Dust and debris can be removed by gently wiping the panels with a damp cloth or rinsing them with water. For stubborn dirt, a mild soap solution can be used, followed by a rinse.
- **UV Protection:** While the panels are UV-proof, prolonged exposure to intense direct sunlight over many years may eventually cause slight fading. No additional UV protection sprays are typically required.
- **Storage:** If storing the panels, ensure they are clean and dry. Store them in a cool, dry place away from direct sunlight to prolong their lifespan.

Troubleshooting

Here are solutions to common issues you might encounter:

Problem	Solution

Problem	Solution
Panels not connecting securely.	Ensure pins are correctly aligned with holes. Apply firm, even pressure. Use zip ties for additional reinforcement.
Panels appear sparse or flat.	Gently fluff and arrange the individual leaves to achieve a fuller, more natural look. The panels are designed with 8 branches per stem for density.
Panels have a slight odor upon unpacking.	This is normal for new polyethylene products. Allow the panels to air out in a well-ventilated area for 24-48 hours. The odor will dissipate.
Panels are not fitting the desired area.	Use scissors or a utility knife to trim the panels to the exact size and shape needed. The grid backing allows for easy cutting.

Specifications

Attribute	Detail
Brand	MELOHO
Model Number	CD-12
Material	Polyethylene
Color	Green
Product Dimensions (per panel)	24"L x 16"W
Number of Pieces	12
Unit Coverage	Approximately 32 Square Feet (for 12 panels)
Assembly Required	Yes
Special Features	UV-proof, Weather-resistant, High Density (8 branches per stem)
