Getting Started

1. Insert the AC cord of the adapter into the power socket and the screen will light up.
2. Connect the charging cable (not included) to the device that needs to be charged and plug it into the adapter. The screen will display the output voltage and power.
3. The product has four charging modes: A, B, C and D. Press the button to switch between modes. Each mode has different output power. Select the most suitable mode for charging according to your device.
4. The screen brightness will automatically adjust according to the surrounding environment.
5. Double-click the button to turn off the screen.
6. Disconnect the device after use.

Use environment

1. Working environment temperature: use at altitudes below 2000 meters and under non-tropical climate conditions.
2. The device is only suitable for indoor use.

3. Storage temperature: -20 ℃ to 40 ℃.

Note:
Please read all instructions and warnings before using this product. Improper use will cause damage to the product.

1. Please do not store this product in high temperature, strong light, or strong magnetic environments. Avoid placing it in harsh environments such as near a heat source. If it gets wet, please let it dry naturally before using it again.
2. When over-voltage, over-current or over-temperature occurs during charging, the charger will automatically stop charging to avoid damage. When returning to the normal state, charging will continue.
3. Do not disassemble, repair or modify this device by yourself.
4. Do not touch the power adapter with wet hands or immerse it in water or any other liquids. Avoid electric shock, fire or damage to the device.
5. It is prohibited to loop or wrap the power cord to avoid overheating of the power cord.
