Assembly Instructions

Follow the detailed step-by-step instructions provided in the kit to assemble your nanoblock Rayquaza model. Due to the small size of the blocks, a clean, flat work surface is recommended. Some sections may require careful handling.

Helpful Tips for Assembly

- Sort pieces by color and shape before starting to make assembly easier.
- Press blocks firmly together to ensure a secure connection.
- Refer to the instruction booklet for visual guidance on each step.
- If a piece is difficult to place, try using tweezers for better precision.

Display and Care

Once assembled, your nanoblock Rayquaza model is designed for display. While the model has some articulation, it is generally delicate due to the micro-sized blocks. Handle with care to prevent pieces from detaching.

Maintenance

- To clean, gently dust the model with a soft brush or compressed air.
- Avoid exposing the model to direct sunlight or extreme temperatures, which may cause discoloration or warping.
- Store in a stable location to prevent accidental falls.

Troubleshooting

Common Issues and Solutions

- **Model is fragile or falls apart easily:** Nanoblocks are micro-sized and can be delicate. Ensure each block is pressed firmly into place. For display models, some users opt for a small amount of model glue on less visible connections for added stability, though

this is not required for assembly.

- **Missing pieces:** While rare, if you believe you have a missing piece, carefully re-check your work area and the packaging. If still missing, contact customer support as detailed in the Warranty and Support section.
- **Difficulty connecting pieces:** Ensure the blocks are correctly oriented. Sometimes, a slight twist or firm, even pressure is needed. Avoid forcing pieces, as this can damage them.

Warranty and Support
