4. Setup Instructions

1. Unfold the splash pad and lay it flat on a smooth, level surface in your desired play area. Ensure the area is clear of any sharp objects, rocks, or debris that could puncture the material.
2. Locate the water inlet on the splash pad.
3. Insert one of the provided rubber washers into the hose connector.
4. Screw the hose connector securely into the water inlet of the splash pad.
5. Attach your garden hose to the hose connector.
6. Slowly turn on the water supply. The outer rim of the splash pad will begin to inflate with water, and water will start spraying from the small holes around the edge.

5. Operating Instructions

Once the splash pad is set up and the water is flowing, you can adjust the spray height:

- The height of the water spray is controlled by the water pressure from your garden hose.
- To achieve a lower spray, reduce the water flow from your hose.
- To achieve a higher spray, increase the water flow from your hose.
- Always ensure the water pressure is not excessively high to prevent damage to the splash pad or discomfort to users.

6. Maintenance and Storage

Proper maintenance ensures the longevity of your splash pad:

- After each use, turn off the water supply and disconnect the hose.
- Allow the water to drain completely from the splash pad. You may need to gently lift or tilt the edges to facilitate drainage.
- Clean the splash pad with mild soap and water, then rinse thoroughly.
- Ensure the splash pad is completely dry before folding and storing to prevent mold or mildew growth.
- Fold the splash pad neatly and store it in the provided storage bag in a cool, dry place, away from direct sunlight and extreme temperatures.

7. Troubleshooting

Problem	Possible Cause	Solution
Water is not spraying or spray is weak.	Low water pressure; kinked hose; clogged nozzles.	Increase water pressure; straighten hose; check and clear nozzles.
Water is leaking from the hose connection.	Loose connection; missing or damaged rubber washer.	Ensure hose connector is tightened; check for and replace missing/damaged rubber washer.
Splash pad does not inflate properly.	Insufficient water pressure; puncture in the rim.	Increase water pressure; inspect for punctures and use the repair patch kit if necessary.
