iDealBed 5i

iDealBed 5i Custom Adjustable Bed Base User Manual

Model: 5i | Brand: iDealBed

Important Safety Information

WARNING: To prevent suffocation or airway obstruction, do not use this product with infants or young children. Do not exceed the weight limit of 1000 lbs. Use the massage feature with caution and follow the instructions provided. Always ensure the bed base is on a level surface and all legs are securely attached before use. Keep children and pets away from moving parts.

Product Overview

The iDealBed 5i Custom Adjustable Bed Base provides enhanced comfort and sleep with full head and foot articulation, massage functions, and convenient features like USB charging and programmable memory positions.

Image: The iDealBed 5i Adjustable Bed Base shown in a partially raised head and foot position.

Key Features:

- Full head and foot articulation (Head up to 80°, Foot up to 50°)

Setup Instructions

Unpacking and Initial Placement:

1. Carefully remove the bed base from its packaging. It is recommended to have two people for this step due to the weight of the unit.
2. Place the bed base upside down on a clean, flat surface to access the leg attachment points.

Attaching the Legs:

The iDealBed 5i comes with multi-option height legs, allowing for various bed heights from 2" to 13". The legs consist of modular sections.

1. Determine your desired bed height. The leg sections can be screwed together to achieve different heights.
2. Screw the chosen leg configuration firmly into the designated attachment points on the underside of the bed base. Ensure all legs are tightened securely.
3. **Important Note:** Do not use only the shortest leg sections. The motor mechanism requires sufficient clearance from the floor. Ensure at least two sections are used to prevent the motor from hitting the floor when the bed adjusts.

Image: A selection of adjustable leg heights for the bed base.

Final Placement and Power Connection:

1. Carefully flip the bed base over onto its legs.
2. Position the bed base in your desired location.
3. Plug the power cord into a grounded electrical outlet.
4. If using a split king setup, connect the synchronization cable between the two bases as instructed in the separate Twin XL manual (if applicable).

Attaching the Foot Retainer Bar:

The foot retainer bar helps keep your mattress in place during articulation.

1. Locate the two small holes at the foot end of the bed base.
2. Insert the ends of the foot retainer bar into these holes.

Operating Instructions

Wireless Remote Control:

The iDealBed 5i is operated using an ergonomic wireless remote control with back-lit buttons for easy visibility.

Image: The wireless remote control for the iDealBed 5i, showing buttons for head and foot adjustments, massage, zero-gravity, flat, and programmable memory settings.

Basic Adjustments:

- **Head Up/Down:** Use the dedicated buttons to raise or lower the head section of the bed. The head adjusts up to 80°.
- **Foot Up/Down:** Use the dedicated buttons to raise or lower the foot section of the bed. The foot adjusts up to 50°.
- **Flat:** Press the "FLAT" button to return the bed to a completely flat position.

Preset Positions:

- **Zero-Gravity:** Press the "ZERO G" button to activate the Zero-Gravity position, which elevates the head and feet to promote circulation and reduce pressure on the lower back.

- **Programmable Memory (M1, M2, M3):**
    a. Adjust the bed to your desired head and foot position.
    b. Press and hold one of the memory buttons (M1, M2, or M3) until the remote light flashes or the bed briefly adjusts, indicating the position is saved.
    c. To recall a saved position, simply press the corresponding memory button.

Massage Function:

The bed base features a Smart Massage function with Deep-Sonic rotating vibration levels.

- **Activate/Deactivate:** Use the massage button on the remote to turn the massage function on or off.
- **Intensity:** Cycle through 3 different intensity options using the dedicated intensity button.
- **Timer:** Set the massage timer for 10, 20, or 30 minutes using the timer button. The massage will automatically turn off after the selected duration.

Additional Features:

- **USB Charging Ports:** Two USB ports are located on the side of the bed base for convenient charging of mobile devices.
- **Under-Bed LED Night Light:** Activate the night light using the remote control for soft illumination under the bed.

Maintenance

General Care:

- Regularly inspect all connections and fasteners to ensure they are secure.
- Keep the area around the bed base clear of obstructions to allow for smooth operation of moving parts.
- Avoid spilling liquids directly onto the bed base or remote control.

Cleaning:

- For the fabric surfaces, use a soft, damp cloth and mild soap if necessary. Do not use harsh chemicals or abrasive cleaners.
- For the metal frame and legs, wipe with a dry or slightly damp cloth.

Emergency Battery Backup:

In the event of a power outage, the emergency battery backup allows you to return the bed to a flat position. Refer to the battery compartment for specific battery type and replacement instructions.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Bed does not respond to remote.	• Power cord unplugged. • Remote batteries are dead or incorrectly inserted. • Remote not paired with the base. • Power outage.	• Ensure power cord is securely plugged into a working outlet. • Replace remote batteries or check polarity. • Refer to the remote pairing instructions in the full manual (if applicable). • Use the emergency battery backup to flatten the bed.
Motor makes noise but bed does not move.	• Obstruction under the bed. • Weight limit exceeded.	• Check for any objects obstructing the bed's movement. • Ensure the combined weight on the bed does not exceed 1000 lbs.
Massage function is weak or only vibrates.	• Expectations for "massage" may differ from vibration. • Intensity setting is too low.	• The massage function provides deep-sonic rotating vibrations. • Increase the intensity setting using the remote control.
Bed does not hug the wall as expected.	• Misunderstanding of "Wall-Hugger" function.	• The Wall-Hugger design moves the bed base slightly backward as the head section rises, maintaining proximity to the wall, but it does not eliminate all gap.

SPECIFICATIONS

Feature	Detail
Model Number	5i
Size	Queen
Material	Steel
Product Dimensions (L x W x H)	80"L x 60"W x 15"H
Maximum Weight Recommendation	1000 pounds
