PKPOWER USB-A to USB-B Cable (6ft)

PK Power 6ft USB Cable User Manual

For ammoon AGM02 Mini 2-Ch Sound Card Mixing Console Mixer and Compatible Devices

1. Introduction

This manual provides instructions for the proper use and care of your PK Power 6ft USB Cable. This cable is designed to connect devices with a USB Type-B port, such as the ammoon AGM02 Mini 2-Ch Sound Card Mixing Console Mixer, to a computer or other USB Type-A host device for data transfer and power supply.

2. Product Overview

The PK Power USB cable features a standard USB Type-A connector on one end and a USB Type-B connector on the other. These connectors are commonly used for peripherals like printers, scanners, and audio interfaces.

Figure 1: Illustration of the USB Type-A (left) and USB Type-B (right) male connectors on the cable. The USB Type-A connector typically plugs into a computer or power adapter, while the USB Type-B connector plugs into the peripheral device.

3. Setup and Connection

Follow these steps to connect your device using the PK Power USB Cable:

1. **Identify Connectors:** Locate the USB Type-A port on your computer or power source and the USB Type-B port on your peripheral device (e.g., ammoon AGM02 mixer).
2. **Connect to Host:** Insert the USB Type-A end of the cable firmly into an available USB Type-A port on your computer or a compatible USB power adapter.
3. **Connect to Device:** Insert the USB Type-B end of the cable firmly into the USB Type-B port on your ammoon AGM02 mixer or other peripheral device.
4. **Verify Connection:** Ensure both ends of the cable are securely seated. Most devices are plug-and-play, and your computer should recognize the connected device automatically.

Figure 2: Example of a USB Type-A to USB Type-B connection. The USB Type-A end connects to the laptop, and the USB Type-B end connects to the peripheral device (shown as a printer in this illustration, but the connection method is identical for devices like the ammoon AGM02 mixer).

4. Operating Instructions

This USB cable functions as a passive conduit for data and power. Once connected, its operation is seamless and integrated with the devices it connects. Ensure your connected devices are powered on and configured according to their respective manuals for proper functionality.

- The cable facilitates data communication between your computer and the connected peripheral.
- It can also provide power to the peripheral device if supported by the USB host and the device itself.

5. Maintenance and Care

To ensure the longevity and optimal performance of your USB cable, please observe the following:

- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid sharp bends, kinks, or excessive pulling on the cable, especially near the connectors. Always grasp the connector housing when plugging or unplugging, not the cable itself.
- **Cleaning:** If necessary, gently wipe the cable with a dry, soft cloth. Do not use liquid cleaners or abrasive materials.
- **Protection:** Keep the cable away from liquids, dust, and corrosive substances.

6. Troubleshooting

If you encounter issues with your USB cable, consider the following troubleshooting steps:

- **Device Not Recognized:**
  - Ensure both ends of the cable are securely connected.
  - Try connecting the cable to a different USB port on your computer.
  - Test the cable with another compatible device to determine if the issue is with the cable or the peripheral device.
  - Ensure the drivers for your peripheral device are correctly installed on your computer.
- **Intermittent Connection:**
  - Check for any visible damage to the cable or connectors.
  - Avoid placing heavy objects on the cable or bending it sharply, which can damage internal wires.
- **No Power to Device:**
  - Verify that the USB port on your computer or power adapter is functioning correctly.
  - Ensure your peripheral device is designed to be powered via USB.

7. Specifications

Feature	Specification
Product Type	USB Cable
Length	6 feet (approx. 1.8 meters)
Connector Type 1	USB Type-A Male
Connector Type 2	USB Type-B Male
Color	Black
Certifications	CE, FCC, RoHS compliant
Item Weight	3 ounces

8. Warranty and Support

PK Power is committed to providing reliable products and excellent customer service.

- **Customer Service:** Our friendly and reliable customer service team is available to assist you. We aim to respond to inquiries within 24 hours.
- **Warranty Information:** For specific warranty details regarding your PK Power USB cable, please contact our customer support with your purchase information.
