SETUP

Install Batteries

Slide the battery compartment cover open and install 1 fresh "AA" battery as shown here. Make certain the "+" and "-" polarity markings on the battery match the markings within the battery compartment. Replace the battery with a fresh one when the display starts to fade or when the unit stops functioning.

Now that setup is complete, you must choose a location to place the indoor comfort monitor. When considering placement options, be sure to choose an area free of water, dust and heat that may effect the accuracy of the humidity and temperature readings on the indoor thermometer.
